

# Average domestic energy storage price per 30kWh in Poland

Is Poland a key player in Europe's energy storage sector?

Poland is emerging as a significant player in Europe's energy storage sector. The recent capacity market auctions in December 2024 highlighted a substantial shift towards BESS, with approximately 2.5 GW secured by new generation capacity market units, predominantly Li-ion energy storage projects.

Does Poland support dynamic electricity pricing?

In summary, Poland's legal and market framework in 2025 fully supports dynamic electricity pricing, making it one of the first in the region to roll this out at scale to households, in line with broader EU energy market integration goals. By law, all large energy suppliers in Poland must offer dynamic pricing contracts as of 2024.

How does a supplier buy electricity in Poland?

In a competitive market, suppliers buy electricity on the Polish Power Exchange (TGE) or via bilateral contracts and then sell it to consumers. For most customers, the energy price portion has traditionally been a fixed rate per kWh (often set in a supplier's tariff or contract).

What is the largest source of electricity in Poland?

Coal: Coal (both hard coal and lignite) remains the largest source of electricity. In 2024, coal-fired power plants produced roughly 57-58% of Poland's electricity. This is a marked decline from about 70% in 2022, reflecting a steady downward trend.

How much tax is added to Poland's energy bill?

Overall, taxes can add roughly 20-25% on top of the pretax price (23% VAT plus the negligible excise).  
Regulatory Charges and Levies: In addition to network tariffs, Poland's bills include a few government-mandated surcharges to support energy policy objectives.

Why did Poland freeze electricity prices in 2025?

Subsidies and Price Caps (2023-2025): In response to the Europe-wide energy crisis and surging electricity prices in 2022-2023, the Polish government implemented protective measures that continue into 2025. Most importantly, the government froze retail electricity prices for certain consumers by law.

China accounted for 8.3 million EVs, the European Union 2.4 million, and the United States 1.6 million.
