Can geothermal energy be used in Indonesia?

the few countries that has the resources and skills to use geothermal energy, with an installed capacity of about 2.3 GW by 2021. The more energy that can be taken out of the geothermal reservoir, the more electricity can be generated. Indonesia has many geothermal resources above 225 °C (high-temperature category). It allows developers to

What is the LCR value of a PV module in Indonesia?

of domestic services and components with an LCR value of up to 45.9%, whereas for the PV module, the LCR reaches 40% (IESR, 2022d). PV module manufacturers in Indonesia have been able to fulfill these requirements. Unfortunately, domestic modules still cannot compete with imported modules in terms of price, quality (i.e., how well they work),
