

Average microgrid storage price per 100MW in Norway

How much does a grid connection cost?

The complexity of grid connection requirements varies significantly based on location and local regulations, with costs ranging from EUR50,000 to EUR200,000 per MW of capacity. System integration expenses cover the sophisticated control systems, energy management software, and monitoring equipment essential for optimal battery performance.

How much does battery storage cost in Europe?

The landscape of utility-scale battery storage costs in Europe continues to evolve rapidly, driven by technological advancements and increasing demand for renewable energy integration. As we've explored, the current costs range from EUR250 to EUR400 per kWh, with a clear downward trajectory expected in the coming years.

How much electricity does Norway produce in 2021?

In 2021, Norway had an electricity production of 157 TWh, of which 91% was from hydropower, 8% from onshore wind, and 1% from thermal sources (NVE, 2021b). This shows that the Norwegian generation mix is already dominated by renewable energy. In normal weather years, Norway exports around 19 TWh of electricity to neighbouring countries.

Will fossil fuel costs affect electricity prices in Norway in 2040?

Electricity prices remain strongly affected by fossil fuel costs to 2040. The 2040 power price in Norway is modelled to be 39-44 EUR/MWh. Market value of Norwegian hydropower is 34% higher than the average power price. Seasonal patterns for solar PV give a 3% probability of revenues higher than the LCOE.

How do carbon prices affect electricity prices in Norway?

Increased carbon prices cause an increase in the cost of importing electricity, as well as increased export of flexible Norwegian hydropower. This increases the value of transmission lines, but it also increases the Norwegian power prices. 3.2.4.

What is the range of technology costs based on Energistyrelsen (2020)?

The range of technology costs is based on Energistyrelsen (2020), and implemented as a change from the base values in Balmorel. Fuel price uncertainty is based on Chen et al. (2021a), but fuel price of biomass is based on extrapolation of historical variations from Energimyndigheten (2020).
