

# Average mobile ESS unit price per 10kW in Vietnam

Is Vietnam a good market for energy storage solutions?

Vietnam represents a promising market for German and European small and medium-sized enterprises (SMEs) specialising in energy storage solutions, thanks to their technical expertise and established reputation in RE technologies.

Why is the demand for battery energy storage systems accelerating in Vietnam?

Export-oriented businesses, especially in manufacturing, are under growing pressure to meet stringent requirements. At the same time, the demand for battery energy storage systems (BESSs) is accelerating, driven by Vietnam's abundant renewable energy (RE) potential, particularly in solar and wind power.

Why do we need battery energy storage systems in Vietnam?

At the same time, the demand for battery energy storage systems (BESSs) is accelerating, driven by Vietnam's abundant renewable energy (RE) potential, particularly in solar and wind power. However, owing to the intermittent nature of these energy sources, storage solutions are required to ensure continuous electricity supply.

How a Bess project is promoting energy storage in Vietnam?

Encouraging domestic enterprises to invest in new technologies will promote the growth of the energy storage industry in Vietnam. Investment in BESS projects in Vietnam is attracting the attention of international partners due to the country's strong potential for RE development.

Does EVN sell electricity in Vietnam?

Retail electricity prices in Vietnam are regulated and, though permitted, price rises are not all that common. This has led to EVN selling electricity below cost price-- In January of 2024, it was losing as much as VND 142.5 per kilowatt-hour sold.

How many MW will Vietnam's storage batteries be able to run?

The plan expects storage batteries to reach a capacity of 300 MW by 2030, accounting for 0.2% of Vietnam's total electricity capacity. However, the policy framework for BESSs in Vietnam is still being refined and will continue to be adjusted to align with the country's economic and environmental development goals.

Electricity prices in Vietnam are regulated by the government and vary by sector, voltage level, time of day (normal, off-peak, peak), and geography. Businesses in industrial parks, service sectors, or using wholesale ...

Statistics of the International Telecommunication Union also show that the mobile Internet unit price/per capita income of Vietnam is very low, equivalent to one third of the world average. According to a survey by Ookla, ...

## **Average mobile ESS unit price per 10kW in Vietnam**

After 4 years of frozen retail electricity prices, EVN increased prices by 5% in 2023 due to a surge in coal prices. Prices continued to rise in 2024. Energy consumption per capita is 1/3 lower than the Asian average in 2023. Vietnam ...

Declining Battery Costs: Falling prices of lithium-ion batteries are making energy storage systems more affordable for residential and utility-scale projects in Vietnam.
