

Average mobile ESS unit price per 800kW in Zimbabwe

Where can I buy ZESA electricity?

Buy from your nearest ZESA office. This is your best bet if the system seems down on other portals. These are the latest ZERA-approved tariffs for the Zimbabwe Electricity Transmission and Distribution Company (ZETDC), the division of ZESA that provides electricity to homes and other final consumers.

How much does ZESA cost per unit?

If you're looking to save money on your ZESA bill, it's important to understand the stepped tariff system. With this system, the more power you consume, the more you'll pay per unit. Here are the current tariffs for each band: For the first 50 units, you will pay 2.27 ZIG per unit (about US\$0.08 per unit), for a total of 113.71 ZIG.

How much does an ESS system cost?

Increased competition in the commercial ESS space Government incentives (e.g., tax credits in the U.S. and Europe) make systems more affordable. For example, in 2022, a 100 kWh system could cost \$45,000. By 2025, similar systems could sell for less than \$30,000, depending on configuration.

Do prepaid meters & electricity tokens work in Zimbabwe?

In many parts of the world, including Zimbabwe, prepaid meters and buying electricity tokens have become a routine part of life. However, a common frustration that consumers often face is the uncertainty surrounding the exact units of electricity one will receive after purchasing your ZESA token.

How do I calculate the cost of my prepaid ZESA units?

Effortlessly calculate the cost of your prepaid ZESA units using this user-friendly ZESA units calculator. Our ZESA calculator is designed to make it easy for you to determine the number of prepaid electricity units you can expect to receive based on the amount you wish to purchase.

What is the electricity rate for the next 51-100 units?

The next 51-100 units are charged a rate of 2.56 ZIG. The idea is to make sure those who are poor can afford electricity but also make sure that those who use a lot of electricity pay more.
