

# Average rooftop solar battery price per 20kW in Netherlands

How many solar panels can cover your roof in the Netherlands?

Solar panels can cover your entire roof in the Netherlands, depending on your energy needs. Image: Freepik To power your home solely using solar energy, you would need anywhere between 15 and 22 solar panels installed.

What are the different types of solar panels in the Netherlands?

There are three main types of solar panels you can get in the Netherlands: monocrystalline panels, polycrystalline panels, and thin film panels. Monocrystalline panels are made using silicon and have an aluminium frame. These panels are more efficient in producing electricity from sunlight because of the structure of the cells.

How much do solar panels cost?

In addition, the specifications of the panels (such as power) and the cost of installation also play a role. On average, you pay around EUR500 to EUR600 per solar panel, including installation. The cost of solar panels depends on the number of panels and the power per panel. In general, the more panels you buy, the cheaper the price per panel becomes.

Should you install solar panels in the Netherlands?

Another reason to consider installing solar panels in the Netherlands right now is that the Dutch government will actually foot part of the bill. Currently, the Dutch government is offering a sustainable energy investment grant (ISDE) to compensate for the cost of energy-saving and sustainable installations.

How much do solar panels cost in 2024?

What do solar panels cost in 2024? For a roof with 10 solar panels, you pay EUR 4408 to EUR 5714 on average in 2024, which you earn back within 4 to 6 years. What your exact investment and payback period are, depend on your wishes and what suits you best.
