

# Average rooftop solar battery price per 800kW in Malaysia

How much do solar panels cost in Malaysia?

Solar panels can range in price from RM3.00 to RM5.50 per watt-peak(Wp), depending on the factors listed above. More efficient panels will typically be more expensive, but they will also produce more electricity per square meter. It is important to strike a balance between price and specifications when choosing solar panels.

Where to buy solar battery systems in Malaysia?

You need not go far to find the right battery systems for your solar panel installation in Malaysia. Solar Boost can help you in your search, purchase, and installation of solar battery solutions wherever in the peninsula you may be. Don't go anywhere else for your battery needs. Solar Boost is your ultimate guide and supplier of everything solar.

Do solar panels save money in Malaysia?

Given the amount of sun in Malaysia, you will save a lot of money on your electricity bill after installation. For instance, a 6.6-kW solar system that generates around 10,000 kWh per year could save about RM3,800 - RM6,400 yearly. This means you could potentially recoup your investment and payback your panels in as little as 5 years.

What are the different types of solar panels in Malaysia?

Some of the common brand of solar panels in Malaysia include First Solar, Jinko, GCL, Hanwha. Another factor in the overall cost to install solar panels for your home is the inverter. For a really cost-sensitive installation you can find an unknown brand generic inverter but be careful because you'll get what you pay for.

Which solar inverter should I buy in Malaysia?

It is much better to pay a little bit more and get a reputable brand that has been servicing the Malaysian market for a few years such as Canadian Solar, Longi or Jinko. You can also choose to opt for a European made inverter and pair this with a premium solar panel.

Why should you choose Malaysia solar power?
