

Average school solar storage price per 30kW in Belgium

Can you install solar panels on a roof in Belgium?

Installing solar panels on your roof is a (very) cost-effective operation. In Belgium, there are a number of subsidies to help cover the cost of installing solar panels. You can also choose the model of the self-consumption of energy produced by panels, which is also very advantageous.

Are solar panels self-consumption a good idea in Belgium?

In Belgium, many people are opting for self-consumption for their solar panels. Here's what it means and what the advantages are: You use the electricity generated by your panels directly. If you produce too much, you can sell the surplus to the electricity grid. The upside of self-consumption :

How much do solar panels cost?

The price of solar panels has dropped significantly in recent years. In addition, you can receive a subsidy from the government for photovoltaic panels. The average solar panel price is around EUR1.26 per watt peak (Wp), although the exact price depends on a number of criteria:

Why do solar panels cost so much?

Number of panels and capacity: the total capacity of the solar panel system has a big impact on the price. Larger systems with more panels cost more, but the price per watt can be lower due to economies of scale. The number of solar panels you need depends on your energy consumption and the power per panel.

Why should you install solar panels in Belgium?

Installing solar panels in Belgium has a number of advantages: Silver side: You pay less for electricity: Your electricity bill is going down. You become more independent : With the right installation, you can produce almost all the electricity you need. You can sell the electricity you don't use.
