

# Average solar diesel hybrid storage price per 20kW in Israel

How much does a battery cost in Israel?

Israel's storage tender sets prices between \$0.0056 and \$0.0085 per kW, with kWh figures therefore at \$49.41 to \$74.20 per kWh. From ESS News Israel has awarded contracts for 1.5 GW of high-voltage battery storage capacity across three regions, marking a significant milestone in the country's energy transition.

What is Israel doing with solar energy?

Total energy consumption has remained quite stable since 2021. Israel is ramping up efforts in the solar sector, with 1.3 GW of projects under development. It awarded 12 licenses to six companies in 2023 as part of the 4th Offshore Bid Round. The Ministry of Energy and Infrastructure supervises the energy sector.

How much energy does Israel use?

Gasoline and diesel prices peaked in 2021, and both fell by 9% in 2022. Israel's consumption per capita is 2.5 toe (i.e., 20% less than the Middle East average), including around 6,500 kWh of electricity (65% above the regional average) (2023).

What does IEA's energy auction mean for Israel?

The auction, managed by the Israeli Electricity Authority (IEA), will facilitate the deployment of large-scale energy storage systems designed to integrate more renewable energy into the grid. With total investments estimated at ILS 3 billion (~\$840 million), the projects are expected to commence operations in 2027.

How much does a kW power plant cost?

The tender, which attracted 11 bidders proposing 29 projects, set capacity tariffs ranging from 2.0 to 3.0 agorot per kW, which in USD is approximately \$0.00564 to \$0.00847 per kW. (Note that a conversion is therefore needed to kWh, which is an annual figure. Fully formed, the price is therefore \$49.41 to \$74.20 per kWh.)

Is primary energy consumption stable in 2021?

Primary energy consumption has remained almost stable since 2021 (around 24 Mtoe), after rising from 2019 to 2021 (2.2%/year). Between 2015 and 2019, consumption was quite stable at around 22 Mtoe.
