

How do I secure debt for Bess & hybrid projects?

Securing debt for BESS and hybrid projects requires a "bankable" revenue forecast from lenders preferred consultants. Developers need their own flexible modelling tools to optimise project design and achieve more favourable financing terms.

Can Bess projects be bundled together?

Independent BESS projects, only supporting renewable energy projects, can be bundled together, and issued as green bonds to potential large investors.

Is Bess a good investment?

Although risk-taking investors seeking a higher return on their investment in BESS can translate into higher energy tariffs, it is not ideal for large-scale adoption of BESS. Moreover, the capital available with this class of investors is limited compared to this solution's growth potential.

What are the barriers to Bess project financing?

Emily Sidhu, director in the banking and investment team at UK Infrastructure Bank (UKIB), explains that the main barrier to the project financing of BESS projects relates to revenues.

How can a Bess project help a net-zero future?

Carbon credits earned from BESS projects can be traded in the market at a favourable price. BESS is considered as a "sunshine industry". Thus, it is important for technology, business, and policy stakeholders to forge a winning partnership to help the global economy leapfrog into a net-zero future.

Could the sheaf deal be used as a template for Bess financing?

Kate Shannon, principal associate at Gowling WLG, legal advisor to Pacific Green on the Sheaf development, suggests the deal could be used as a template for future BESS project financings. "Part of the process of lenders getting more comfortable with BESS financing is going to be the documents looking how they expect them to look," she explains.

As the renewable energy sector rapidly evolves, battery energy storage systems (BESS) are emerging as a critical pillar for decarbonization. However, with capital constraints and rising market ...

The government of India launched a INR 37.6 billion (~USD 452 million) viability gap funding program to support the installation of 4 GWh of BESS by the financial year 2026. In addition, to reduce reliance on imports, ...
