

Why is a Bess project a good investment in Australia?

The increase in energy consumption, driven by rapid electrification, data consumption and AI, coupled with Australia's supportive regulatory policies and record low renewable energy capital expenditures (capex) costs, have fuelled a competitive environment for quality BESS projects.

How much does Bess cost?

The cost of BESS has fallen significantly over the past decade, with more precipitous drops in recent years: This is nearly a 70% reduction in three years, owing to falling battery pack prices (now as low as \$60-70/kWh in China), increased deployment, and improved efficiency.

Will Bess capacity double in the NEM in 2025?

BESS capacity in the NEM will double (and double again and again) Battery energy storage will play a significant role in this transition. Installed BESS capacity in the NEM will more than double in 2025 and double again by the end of 2026.

Who is bidding in Bess capacity?

To date, existing energy traders have been the primary participants bidding in BESS capacity. However, as discussed by Matt Grover of Fluence in his article 'The growing NEM BESS fleet: Who is controlling all this capacity, anyway?', by the end of CY26, 40% of BESS traders will be new entrants.

How can a Bess system help a business in Australia?

Diversify revenue streams (e.g., FCAS, shifting) through flexible contracts, complementary technical setups (e.g., duration, hardware) and detailed modelling/sensitivity testing. Australia's BESS regulations are both complex and continuously evolving.

Why are Bess revenues declining in the NEM?

Historically, BESS revenues in the NEM have mostly been from the FCAS markets. However, these have been declining year on year since 2020. High revenues that year were driven by extremely high FCAS prices in South Australia in January. 2024 marked the first year that energy trading has overtaken FCAS in value for battery energy storage.

Essentially, BESS is a collection of batteries to store electrical energy, and a crucial component in balancing fluctuations in RE output, especially solar power, and preventing sudden surges that could damage the grid or ...

Akaysha Energy's Waratah Super Battery (above) will be one of the largest batteries to come online in the next three years. Image: Akaysha Energy UK-headquartered energy industry data platform Modo Energy has ...

Using significant volumes of "price-taking" bids is a strategy that traders will need to consider increasingly carefully as time goes on. Recent Contingency FCAS prices are lower than what some have calculated the cost to be, to provide the ...

These BESS projects are mainly scheduled to commence operation during 2025 and 2026. One noteworthy project that shows the challenges of storage systems is the Australia-Asia PowerLink scheme ...

Written by: Modo Energy Share Q1 2025 Buildout Report: How quickly is BESS coming online in the NEM? Australia's National Electricity Market (NEM) has one of the world's largest battery ...

That's mainly because of lower price volatility as the country moves out of summer." February 2025 experienced a surge in BESS revenue within Australia's NEM, primarily influenced by market price volatility. Across ...

The first tender of Australia's Capacity Investment Scheme (CIS) has delivered 6.38 GW of renewables generation projects, which collectively will provide power to 3 million ...

Four new big battery projects have been awarded in Western Australia (WA) as part of the state's first tender under Australia's CIS. The national CIS program aims to drive 9 GW of energy storage systems by 2030 ...

Similarly, Australia is likely to see 100-200% yoy growth in BESS deployments in 2025 and 2026, driven by the 5-minute time intervals and price only nature of our electricity market, with a ...

429 Battery Energy Storage Tenders in India 2025 Search all local Tenders for Battery Energy Storage. Download Battery Energy Storage Tender Documents. In 2025 429 Battery Energy ...

The rapid evolution of the utility-scale battery energy storage systems (BESS) market in Australia, Europe and the US has seen the emergence of a wide range of offtake products. These arrangements offer opportunities for ...

The first quarter of 2025 was the second best on record for investment in large-scale Battery Energy Storage Systems (BESS) in Australia, with six projects worth \$2.4 billion in total reaching the financial commitment ...

In August 2025, battery energy storage revenues in Australia's National Electricity Market (NEM) rose by 37% despite mild energy price volatility. This rise was due to intense and frequent ...

August 26, 2025 / Staff / Solar Tenders & Auctions SECI Tenders 600 MW/1,200 MWh BESS Project in Andhra Pradesh The Solar Energy Corporation of India (SECI) has issued a request for proposal for the development of a 600 ...

Search all the battery energy storage system (BESS) projects, bids, RFPs, ICBs, tenders, government contracts, and awards in Australia with our comprehensive online database.

The report titled Returns Charge Ahead As Battery Prices Discharge notes that standalone Battery Energy Storage System (BESS) tariffs have stabilised in the range of ...
