

How much Bess capacity will Italy have by 2030?

That is why Italy aims to add 15GW of BESS capacity by 2030 (of which 11GW should be standalone and 4GW co-located). As of March 2025, Italy has got 1GW of grid-scale BESS capacity online, placing the country in third place in Europe (shared with Ireland) in terms of installed capacity, behind Germany (1.6GW) and the UK (5.6GW).

Is Italy a good place to invest in battery energy storage system?

I consent to my submitted data being processed and stored by Timera Energy in compliance with our Privacy Policy. Italy has emerged as one of the most attractive European markets for Battery Energy Storage System (BESS) investment. Much of the attention has centered around the bankability opportunity offered by the MACSE capacity payment scheme.

How does Italy's electricity market work?

**Zonal Market Dynamics:** Italy's electricity market is a zonal market, with seven geographic zones affecting short-term price volatility and influencing BESS investment strategies. **MACSE Subsidy Scheme:** The new MACSE scheme offers 15-year contracts for energy storage projects and guarantees indexed linked revenue.

What will PNIEC Italy do in 2030?

PNIEC Italy envisions a robust energy storage landscape by 2030, targeting a total installation of 22.5 GW. This portfolio includes 8 GW of pumped hydro systems (largely already in place), 4 GW of distributed storage systems connected to residential solar projects, and a significant 11 GW commitment for new utility-scale facilities.

Is Italy a good place to invest in backup power?

In the third part of our series on backup power in Europe, we examine the lucrative BESS investment landscape of Italy. In part 1 of our series on backup power in Europe, we named Italy as one of the most attractive European countries for BESS investments.

What are Italy's energy storage goals?

**Energy Storage Goals:** To balance the grid with increased renewable energy, Italy targets 11 GW / 58 GW of grid-scale energy storage capacity by 2030, requiring substantial investment and development.

What are the opportunities and challenges for business cases for stand-alone battery energy storage systems (BESS) in European markets like Germany, Italy, France, The Netherlands, Romania and Austria? Expert ...

**Revenue Streams for BESS:** The business case for BESS in Italy is underpinned by four main revenue streams: wholesale trading, the Ancillary Services Market (MSD), the Capacity Market (MC), and the new

energy ...

Terna is the Italian TSO and is driving the grid-scale storage market in Italy by opening up business opportunities for the technology. Image: Terna. The grid-scale energy ...

The development of large-scale battery projects aligns with CIP's growing focus on energy storage. With Italy's supportive regulatory environment, the partnership aims to leverage CIP's expertise to advance its ...

To meet its 2030 renewable energy targets, India needs annual investment of \$120bn-140bn, increasing to \$7.2trn-12.1trn by 2050 for net-zero ambitions. Financing from both domestic and international sources is crucial, with the ...

The majority of newly installed large-scale electricity storage systems in recent years utilise lithium-ion chemistries for increased grid resiliency and sustainability. The capacity of lithium ...

The Energy Storage Association (ESA) has an energy storage vision "of 100 GW by 2030" and that goal is right on schedule, even with the economic downturn and global pandemic. The growth is primarily comprised of large grid-connected ...

Both the US and global energy storage markets have experienced rapid growth over the last year and are expected to continue expanding rapidly in order to support grid resiliency. Through 2030, the global ...

As such, we're providing this "Cheat Sheet for Energy Storage Finance" based on our work as buy-side and sell-side investment bankers experienced in both energy storage venture capital and project finance. I'm also including some ...

Recently, Peak Power conducted an energy storage finance webinar that focused on strategies available for financing battery storage system projects. The webinar aimed to provide valuable insights into financing options ...

In a bold move to meet EU emissions targets, Italy is accelerating its solar energy and industrial energy storage deployment under the PNIEC Italy plan. With installations ...

Joint venture launched with Nexta Capital to develop up to 1.5 GW of battery storage in Italy, making the most of when it's sunny and windy Marks second deal in Italy by ...

Italian renewable energy developer GreenGo has received authorisation for two new battery energy storage system (BESS) projects, adding 80 MW of planned capacity in ...

A render of a battery storage project from Innovo Group, which has teamed up with Iberdrola to deploy

large-scale solar, wind and storage in Italy. Image: Innovo Group. The grid-scale energy storage market in Italy is set ...

However, renewable energy assets will only fulfil their true potential if their deployment is accompanied by the build-out of sufficient amounts of energy storage facilities. As the World ...

By enabling greater shares of renewables in the power system and shifting electricity supply to when it's most needed, batteries will help advance progress on the goals set at COP28. These ...
