

# Commercial energy storage project financing options in France 2025

Who is delivering a battery energy storage system in France?

China's Envision Energy has been selected by Kallista Energy to deliver a 120 MW/240 MWh battery energy storage system (BESS) in Saleux, northern France. The project represents Envision's first independent storage contract in the French market and signals its continued European expansion.

What is TagEnergy doing in 2025?

TAGENERGY, a global leader in low-carbon energy solutions, launches construction of France's largest battery energy storage platform (France, Marne). This landmark project marks the start of an ambitious expansion plan for 2025, with accelerated solar and storage development activities.

How many GWh of storage capacity will NW have in 2025?

This amount will enable the Group to operate more than 2 GWh of storage capacity in France and Finland by the end of 2025. Complementing the equity financing of EUR300 million to be raised in 2022, this financing by two leading institutions confirms the solidity of NW's business model in France and, for the first time, internationally.

How much non-recourse financing has NW secured for its storage projects?

NW has secured EUR430 million non-recourse financing for its storage projects in France and Finland.

What is TagEnergy doing in France?

"TagEnergy is proud to announce this flagship project in France, just weeks after connecting the first phase of the Southern Hemisphere's largest wind farm in Australia and the UK's largest transmission-connected battery", said Franck Woitiez, CEO of TagEnergy.

The main benefits of using Commercial Property Assessed Clean Energy (C-PACE) financing for energy storage projects include: Long-term, Fixed-rate Financing: C-PACE ...

The United States and global energy storage markets have experienced rapid growth that is expected to continue. An estimated 387 gigawatts (GW) (or 1,143 gigawatt hours (GWh)) of new energy storage ...

Standalone Energy Storage Systems (ESS) are rapidly emerging as a key market, with 6.1 gigawatts of tenders issued in the first quarter of 2025 alone, accounting for 64% of the total utility-scale energy storage ...

This partnership with Banque des Territoires complements TagEnergy's innovative financing model, bringing ambitious storage projects into productive reality. With a long-standing ...

Innovative financing models and public-private partnerships are paving the way for the large-scale deployment

of energy storage technologies essential for integrating ...

Foreword As part of the U.S. Department of Energy's (DOE's) Energy Storage Grand Challenge (ESGC), DOE intends to synthesize and disseminate best-available energy storage data, ...

With the transformation of the global energy structure and the rapid development of renewable energy, the commercial and industrial energy storage (C& I ESS) market will see ...

Similar to other renewable energy projects, the addition of construction bridge debt provides an additional source of capital to pay construction costs, but also adds ...

NW announced today that it has secured EUR 430 million in non-recourse bank financing from international banks Santander CIB and Rabobank. This amount will enable the Group to ...

BNP Paribas, which was ranked No. 1 worldwide for sustainable bonds and loans for the 2nd consecutive year by Dealogic, with \$69.2 billion in 2024, is a driving force in the financing of renewable energy infrastructure, ...

Market Segments: The European outlook shows strong growth in residential, commercial & industrial (C& I), and utility-scale batteries, with France ranking high in storage investment ...

This landmark project marks the start of an ambitious expansion plan for 2025, with accelerated solar and storage development activities. TESLA, a key partner, will ...

The next big challenge for energy storage, after bringing down the cost so that storage is economic and finding a suitable business model, is financing. There are two ways to ...

TagEnergy will develop and manage the Cernay-l'Évêque-Reims project, which is scheduled for grid connection in late 2025. It will have a storage capacity nearly five times larger than France's current largest operational battery.

This diverse group of stakeholders underscores the growing support for energy storage as a critical component of the future energy infrastructure. Mufasa stands out as the largest utility-scale battery storage ...

The study concludes with five policy recommendations designed to accelerate battery storage deployment and ensure energy systems are prepared to integrate high levels of ...
