

ESS container cost vs benefit calculation in Chile

What are the costs and benefits of ESS projects?

Costs and benefits of ESS projects are analyzed for different types of ownerships. We summarize market policies for ESS participating in different wholesale markets. Energy storage systems (ESS) are increasingly deployed in both transmission and distribution grids for various benefits, especially for improving renewable energy penetration.

How much energy storage will Chile have in 2024?

During the Energy Storage Summit Latin America (ESS LatAm) in October 2024, Ana Rojas, executive director at the Chilean renewable energy and energy storage association (ACERA), explained how the current levels of curtailment in Chile, which could end up at approximately 5TWh in 2024, could power up to 3.4GW of 4-hour duration energy storage.

Should energy storage be a luxury asset in Chile?

Having energy storage in Chile is no longer a luxury asset but has become an "absolute necessity", explains Alejandro McDonough, business development manager of Americas area sales at Energy Storage and Optimisation (ES&O).

Does ESS affect electricity price?

The supply curve in the New York Independent System Operator (NYISO) day-ahead energy market is modeled to evaluate the impact of ESS on electricity price. The operation and degradation cost is, however, set to be \$1/MWh, which is significantly less than the practical cost.

How does BESS reduce the energy cost per unit?

To cut the energy cost per unit, BESS plays an important role by storing energy at an off-peak time for on-peak-time use with relatively lower prices. For the all-time minimum overall systems cost, the distribution system requires an optimal size of the BESS to be connected to provide optimal scheduling of DGs.

What's happening in Chile's BESS market?

The current wave of excitement around Chile's BESS market started in October 2022, when the Chilean government passed legislation that incentivised the deployment of energy storage. The bill allows standalone energy storage systems to receive income from dispatching their energy and power in the country's National Electric System market.
