

# Enterprise ESS system project financing options in Australia 2026

What is ESS & Energy storage industries' partnership with ESI?

ESS and Energy Storage Industries formed a partnership to assemble and distribute large-scale iron flow batteries across the Oceania region. Under an agreement signed in 2022, ESS will initially supply Energy Warehouse systems manufactured in the US to ESI.

How much energy will ESI produce in 2026?

The company is aiming to produce 200 MW/1.6 GWh of energy storage annually by the end of 2026, with plans to expand to 400 MW/3.2 GWh. In January 2023, ESI commissioned the first ESS iron flow battery in Australia at the National Battery Testing Centre at the Queensland University of Technology.

What is the energy saving scheme (ESS)?

The Energy Saving Scheme (ESS) provides financial incentives to companies who undertake eligible projects that either reduce electricity consumption or improve the efficiency of energy use.

When will ESI start manufacturing energy warehouse systems?

Starting in 2025, ESI will begin conducting final assembly of Energy Warehouse systems in Queensland, with core technology supplied by ESS, for distribution across Australia, New Zealand, and Oceania. Founded in 2011, ESS manufactures LDES systems for utility- and commercial-scale energy storage applications.

Will ESS Tech 'give birth' to the next phase of ESS growth?

US-based ESS Tech (NYSE:GWH) sees various government initiatives and a partnership with Australia's Energy Storage Industries (ESI) as 'giving birth' to the next phase of ESS' growth.

Will ESI build a new energy hub?

The hub tests new energy technology including wind, solar, hydrogen and battery storage. ESI will build a \$70 million facility in Maryborough, Queensland to assemble ESS' Energy Warehouse systems, starting in 2024. The facility is expected to create up to 500 jobs.
