

Expected ROI of backup power battery project in Italy 2025

Is Italy a good place to invest in backup power?

In the third part of our series on backup power in Europe, we examine the lucrative BESS investment landscape of Italy. In part 1 of our series on backup power in Europe, we named Italy as one of the most attractive European countries for BESS investments.

How much Bess capacity does Italy have in 2025?

As of March 2025, Italy has got 1GW of grid-scale BESS capacity online, placing the country in third place in Europe (shared with Ireland) in terms of installed capacity, behind Germany (1.6GW) and the UK (5.6GW). Another 1.75GW is under construction, projects totaling 230MW have obtained permits, and 1.2GW of new BESS capacity has been announced.

How much energy storage capacity does Italy have?

As of November 2024 Italy had 5.1 GW/11.7 GWh of energy storage capacity. This is almost exclusively small-scale residential system, with utility-scale storage systems providing just 864 MW. To help achieve the target for utility-scale storage build-out, the Italian government has implemented the MACSE subsidy scheme as supporting legislation.

What are the key market trends for battery storage?

It covers key market trends, with a particular focus on the shift toward utility-scale storage, the continuing growth of residential and commercial installations, and the evolving role of battery storage in supporting Europe's clean energy goals.

What are the key challenges facing battery storage?

It also outlines the key challenges facing the sector, including underdeveloped frameworks and barriers to investment. The study concludes with five policy recommendations designed to accelerate battery storage deployment and ensure energy systems are prepared to integrate high levels of renewable energy.

How is the Italian government aiming for 15GW of Bess capacity?

The Italian government is aiming for 15GW of BESS capacity by 2030 to maintain security of supply. The Italian government, regulator, and Transmission Service Operator (TSO) are creating an attractive regulatory environment for BESS by offering multiple incentive schemes and updating the grid code.

- Calculating your potential return on investment - Considering future energy needs and system scalability - Checking warranty terms and after-sales support With proper ...

Italy is the most attractive European battery market, Aurora Energy Research has claimed, followed by Great Britain and Germany. The three leading markets are identified in the fourth edition of Aurora's European ...

Expected ROI of backup power battery project in Italy 2025

As a result of the new regulations, the addition of grid battery storage in Italy is expected to increase to 5.2 GWh in 2024, which corresponds to 67% of the total Italian battery ...

Covering 28 European countries, the report identifies Italy, Great Britain, and Germany as the most attractive markets for Battery Energy Storage Systems (BESS) investment while also ...

We provide a detailed report on all the major Battery Storage construction projects around the world with key focus on the largest projects in Europe, Africa, USA and Asia

As a result of the new regulations, the addition of grid battery storage in Italy is expected to increase to 5.2 GWh in 2024, which corresponds to 67% of the total Italian battery storage market. By 2028, an annual new ...

Enabling renewable energy with battery energy storage systems The market for battery energy storage systems is growing rapidly. Here are the key questions for those who want to lead the ...

The majority of newly installed large-scale electricity storage systems in recent years utilise lithium-ion chemistries for increased grid resiliency and sustainability. The capacity of lithium ...

The system will automatically detect and integrate the battery storage, providing backup power and energy optimization capabilities. Do Huawei inverters work with optimizers? ...

Aurora Energy Research has released the latest edition of its European Battery Markets Attractiveness Report (BatMAR), ranking Italy, Great Britain, and Germany as the ...

Right now, battery storage projects aren't making enough money without some form of government support in Italy - that's why choosing between these market mechanisms is so crucial. The capacity market in the ...

Italy forecast to deploy more storage capacity than any other European nation in 2024 BW ESS, Emeren, Nuveen, Energy Vault, Octopus & Pacific Green among players to have made moves in Italian market in last year ...

What is the "Pioneer" project and why is it significant? The "Pioneer" project is Italy's largest second-life battery storage system (10 MWh). It is significant because it ...

A panel titled "Interactive Deep Dive Italy: Choosing the best path for BESS ROI in Italy - MACSE, capacity market, or merchant strategies?" at the Battery Business & ...

Italian renewable energy developer GreenGo has received authorisation for two new battery energy storage system (BESS) projects, adding 80 MW of planned capacity in ...

Expected ROI of backup power battery project in Italy 2025

The most relevant recent development for BESS operators in the Italian market is the introduction of MACSE. MACSE is a new capacity auction which offers 15-year contracts for energy storage projects. The first MACSE ...
