

# Expected ROI of business energy storage project in South Africa 2026

Where will the battery energy storage project be implemented?

The Project will be implemented at approximately 17 sites, located within or adjacent to existing distribution substations of Eskom, across four provinces of South Africa. The Battery Energy Storage Project (Project) provides a solution to address both challenges.

Is South Africa ready for battery storage?

The South African government has acknowledged the potential of battery storage and has set ambitious targets for its deployment. The 2019 Integrated Resource Plan (IRP) and Eskom's Transmission Development Plan (TDP) project a need for 2GW to 6.6GW of battery storage capacity to be installed by 2032.

How long does it take to build a storage facility in South Africa?

Project construction is expected to take no more than 24 months and the storage capacity is expected to come online no later than November 2026. The projects will attract a total investment of R4.7 billion. South African Entity Participation of around 42.23%, and BEE ownership of 40% has been achieved across both projects.

Which energy storage technology is used in South Africa?

st days. Complementing these technologies, the most commonly used energy storage solution in South Africa is Lithium-Ion batteries. This storage technology is favoured for its high energy density, efficiency, and ability to support the grid during peak demand or outages, making it a reliable partner for both solar and wind energy systems. For b

How much storage capacity does South Africa have?

Following the signing of the agreements with these additional two projects South Africa has secured a total of 360 MW/1440 MWh storage capacity under the country's first grid-scale bid window.

How has energy storage changed in 2022?

This has resulted in an increase in energy storage levels in recent years. In 2022, the continent had around 50MWh of energy storage capacity installed. Since then, energy storage capacity tripled in 2023 and then experienced another 10-fold increase in 2024. Image: AFSIA Solar.

The Role of Renewable Energy Energy-related projects account for R113 billion of the total investment. The Risk Mitigation Independent Power Producer Procurement Programme ...

Construction of both projects is expected to take "no more than 24 months" with the storage capacity expected to be available to the grid by November 2026. R4.7-billion investment Ramokgopa said the two projects will

...

## Expected ROI of business energy storage project in South Africa 2026

The plant, located in the Northern Cape province of South Africa, will be equipped with the largest solar photovoltaic (PV) installation in the country, of 442 MW, with about 1,200 MWh of battery storage. Acwa Power to ...

As South Africa navigates its energy transition, the Oasis project highlights the importance of collaboration, innovation, and investment in building a cleaner, more resilient energy future.

Although South Africa has a high level of access to electricity relative to other sub-Saharan African countries, its electric power sector experiences frequent power outages because of ...

Envision Energy has secured an order to supply three battery energy storage systems (BESS) for South Africa's Oasis 1 cluster of projects, which has a total of 257MW of capacity and 1,028 megawatt hours (MWh) of ...

South Africa's power plants present a myriad of business opportunities in the rapidly evolving energy sector. With the country's commitment to expanding its energy capacity and ...

Electricity storage is going to be key not only in helping South Africa meet its considerable industrial and domestic demand for energy but also across Africa as more ...

"Battery storage is lagging behind energy generation investment - and that's mainly a reflection of the cost." "Projects that do include a battery component require either a fairly high tariff for the power," he says, "or you ...

1.3 Sectoral context 10. South Africa is also one of the world's largest coal producers and uses coal as the main primary energy source for the economy. In 2022, coal dominated the South ...

Paris, December 15, 2023 - TotalEnergies and its partners are launching construction of a major hybrid renewables project in South Africa, comprising a 216 MW solar plant and a 500 MWh battery storage system to manage the ...

The early-stage investment from SA-H2 Fund and the strong backing from South African development finance institutions are critical in de-risking the project to attract this larger pool of capital. Following financial close, ...

The Africa Energy Indaba 2026 is set to take place in Cape Town, South Africa, at the Cape Town International Convention Centre. The venue offers premium facilities for the event, and convenient access to various attractions such as ...

South Africa has released the list of preferred bidders for solar and battery storage projects to be developed

## **Expected ROI of business energy storage project in South Africa 2026**

under its Renewable Energy Independent Power Producer ...

While the 2025 budget's commitment to energy investment is promising, execution, policy consistency, and financial incentives will determine its impact. Addressing key barriers and fostering a stable investment ...

Battery enclosures at Manatee Energy Storage Center, hailed by FPL as the world's largest solar-charged BESS when it went into operation in 2021. Photo by Doug Murray ...
