

Expected ROI of commercial energy storage project in Spain 2026

Does the capacity market guarantee the profitability of storage projects?

The capacity market is a mechanism designed to ensure the security of electricity supply, complementing revenues from generation, storage, and demand response. However, it should not be considered a tool to guarantee the profitability of storage projects.

How is the capacity market developing in Spain?

The development of the capacity market in Spain has progressed in recent months with the publication of a public consultation in December 2024. The process is currently following these steps: Public consultation: Recently concluded after a six-week period, during which feedback was received from various industry stakeholders.

Why does Spain's BESS pipeline lag compared to Italy's?

Spain's BESS pipeline lags equivalent markets... Despite having a small install base, Italy's current install base and 2030 pipeline is 6.8x that of Spain's due to the presence of a Capacity Market and Firm Reserve (similar to FCR) tenders.

How many MW of storage operative capacity?

870 MW of storage operative capacity. Plants with specific remuneration. 10-15 years of track record. Very early stage of implementation. Growing pipeline under development with wind and PV assets. Spanish suppliers entering the market. Positive impact on the access capacity auctions.

Large-scale liquid air energy storage (LAES) systems which can store and discharge energy for up to six hours are being planned in Spain by technology provider ...

Image: Tyspa Independent power producer (IPP) Enlight Renewable Energy is expanding its Gecama Wind Project in Castilla-La Mancha, Spain, by integrating solar PV and battery energy storage systems (BESS). ...

Greenergy will scale its hybrid model, combining solar PV with battery storage, from its flagship Oasis de Atacama project in northern Chile to a new platform, Central Oasis, in the central region of the country, and to Spain ...

Significant investment is also occurring in the UK, where work is set to begin on the world's first commercial liquid air energy storage project in 2025, in addition to a number of BESS, pumped hydro storage, hydrogen ...

This ten-year agreement involves the 300MW Tordesillas PV project located in Valladolid, within the autonomous community of Castilla y León. Project Details The Tordesillas solar site is expected to begin commercial ...

Expected ROI of commercial energy storage project in Spain 2026

The European Commission on Monday approved a new aid scheme for the deployment of large-scale electricity storage in Spain. Subsidies will be available for standalone energy storage sites, projects installed ...

The Spanish energy storage company Greenergy has announced a US\$2.6bn investment plan for 2023-2026 aiming to promote energy storage within the energy sector. The ...

This move towards building more BESS and hybrid solar-plus-storage projects continues in the direction of its previous strategic plan spanning between 2023-2026, when Greenergy announced a US\$2.6 ...

Once completed, the Gecama Hybrid Project is expected to become the largest renewable energy complex of its kind in Spain and to play a key role in advancing storage ...

The majority of newly installed large-scale electricity storage systems in recent years utilise lithium-ion chemistries for increased grid resiliency and sustainability. The capacity of lithium ...

Spain's solar market is experiencing significant growth, creating a wave of project and investment opportunities worth watching. With a combination of natural resources, policy stability, and innovative market ...

Conclusion The capacity market in Spain represents an opportunity for the storage sector but cannot be considered the sole basis for investment. Its design must be ...

The energy storage sector maintained its upward trajectory in 2024, with estimates indicating that global energy storage installations rose by more than 75%, measured by megawatt-hours ...

LONDON (ICIS)-Spain should prioritize investing in energy storage to prevent market volatility and balance surplus supply. With low Spanish demand levels for power and ...

The Spanish Government has allocated a considerable sum of 160 million euros to finance energy storage projects, with the aim of connecting 600 MW to grid for the year 2026. Besides, an additional investment of 100 ...

Energy sector stakeholders in Spain--including developers, investors, and infrastructure operators--face a critical year of legal and regulatory developments. Renewable generation is hindered by declining prices, lack of ...
