

Expected ROI of hybrid renewable storage project in Egypt 2025

Will Egypt build a solar and battery storage hybrid project?

The energy project will encompass a 1GW solar and 100MW/200MWh battery storage hybrid project, the first of its kind in Egypt. Construction on a solar and battery storage hybrid project in Egypt is set for the first half of 2025.

What is a hybrid energy project in Egypt?

It will be one of the first hybrid renewable energy projects in Egypt and is expected to serve as a pilot for uptake of the technology in the country. The project will support the green energy transition in Egypt while helping keep the grid stable and reliable in the face of growing electricity demand.

How much green methanol will Egypt produce in 2027?

The investment covers clean energy generation, with an annual production capacity of up to 100,000 tons of green methanol by 2027. Have you read? The energy project will encompass a 1GW solar and 100MW/200MWh battery storage hybrid project, the first of its kind in Egypt.

Could battery storage be a game-changer for Egypt's energy sector?

The integration of battery storage with solar PV is a game-changer for Egypt's energy sector, providing reliable and dispatchable renewable energy and reducing reliance on fossil fuels. It not only meets Egypt's current energy needs but also sets a precedent for future dispatchable hybrid renewable energy projects in the region."

How does the EBRD invest in Egypt?

The EBRD's areas of investment in Egypt include the financial sector, agribusiness and manufacturing and services, as well as infrastructure projects in the power, municipal water and wastewater service sectors, and contributions to upgrading the transport sector.

Does Egypt have a green energy deal with Scatec?

Last year Egypt signed a memorandum of understanding (MoU) with Scatec to supply ships with green fuel in East Port Said, with investments worth around \$1.1 billion. The investment covers clean energy generation, with an annual production capacity of up to 100,000 tons of green methanol by 2027.

Pioneering Hybrid Renewable Energy This project stands out as one of Egypt's first hybrid renewable energy ventures, integrating solar power generation with substantial ...

Scatec, a renewable energy solutions provider, has secured \$479.1 million of non-recourse project financing to develop the Obelisk hybrid solar and battery storage project ...

Norway's Scatec has commenced construction of its 1.1 gigawatt (GW) Obelisk solar and 100 megawatts

Expected ROI of hybrid renewable storage project in Egypt 2025

(MW)/200 megawatt-hours (MWh) battery storage project in Egypt, marking the Arab country's first large-scale hybrid ...

Oslo/Cairo, 05 May 2025: Scatec ASA has commenced construction of its 1.1 GW Obelisk solar and 100 MW/200 MWh battery storage project in Egypt. The energy will be sold under a USD ...

The project not only embodies a commitment to renewable energy but also significantly contributes to Egypt's ambitious objective of achieving 42% renewable energy in its power generation mix by 2030. Project ...

The integration of battery storage with solar PV is a game-changer for Egypt's energy sector, providing reliable and dispatchable renewable energy and reducing reliance on ...

Egypt could realistically, and cost-effectively, supply 53% of its electricity mix from renewables by 2030, double the share to be expected from current plans and policies, the report finds. With ...

Introduction As countries transition from centralized to decentralized grid networks, the necessity for investments in new energy technologies becomes imperative. The trend of rapid adoption of ...

On June 15, 2025, Egypt and Norwegian renewable energy developer Scatec announced the financial close on "Obelisk" - a landmark \$600 million hybrid solar and battery storage project ...

The funds from this Obelisk Hybrid Solar and BESS Project Financial Close be provided will be utilized in the development of a 1.1 GW solar photovoltaic (PV) power plant ...

Oslo/Cairo, 15 June 2025: Scatec ASA has reached financial close for the "Obelisk" hybrid solar and battery storage project in Egypt. The non-recourse project financing comprises USD 479.1 ...

The Obelisk project will create one of the first hybrid renewable energy sites in Egypt and is expected to serve as a pilot for the technology's uptake in the country, according ...

The 200 MWh storage system will provide crucial grid services in Upper Egypt, a region that has historically suffered from weaker transmission infrastructure. The project is backed by a 25-year power purchase agreement ...

The company is also in advanced discussions with potential equity partners, expected to conclude in the same timeframe. "We are proud to break ground on Egypt's first hybrid solar and battery project, building on our ...

The plant will operate under a build-own-operate model, with feasibility studies expected to conclude by late 2025. . Alcazar Energy signs MoU with Egypt's EETC and NREA ...

Expected ROI of hybrid renewable storage project in Egypt 2025

Scatec ASA has commenced construction of its 1.1 GW Obelisk solar and 100 MW/200 MWh battery storage project in Egypt, the energy generated from the facility to be ...
