

Expected ROI of hybrid renewable storage project in Netherlands 2026

Will return deliver 3 GW of energy storage in Europe?

With a strong track record and a BESS portfolio of 7 GW in development across Europe, Return is focused on bringing this capacity online within the next seven years. The company is on track to deliver at least 3 GW of energy storage by 2030, shaping the future of large-scale energy storage in Europe.

Does the EU have a target for energy storage assets?

While the EU Commission has not yet set specific targets for energy storage assets, as part of the electricity market reform plans they announced a list of recommendations on energy storage. These recommendations offer member states guidance on how best to exploit the potential of energy storage.

Will a 200 MW storage facility connect to TenneT in 2026?

First 200 MWh storage facility to connect directly to TenneT in 2026. A 100 MW / 200 MWh battery energy storage system in Waddinxveen, capable to power 50% of the city of The Hague, is set to go live mid 2026 and has a critical role in stabilizing the Dutch grid and accelerating the transition to renewable energy.

What will Antares do for the Dutch energy system?

As grid congestion continues to challenge the Dutch energy system, Antares will store excess renewable energy, deploying it when demand spikes to stabilize the grid. As the first active large-scale BESS location in the Netherlands directly connected to TenneT, it will play a pivotal role in enhancing grid flexibility.

ELYgator Earlier this year, the French company Air Liquide announced its plans to develop, construct and operate a 200 MW electrolyser at the first conversion park on the Maasvlakte. This hydrogen plant, named ...

South Africa's energy sector is set to receive a major boost as Saudi Arabia's Acwa Power has signed a power purchase agreement for the country's largest hybrid dispatchable renewable power project. The project, ...

Dutch developer Lion Storage has successfully reached financial close for its Mufasa project, one of the largest battery energy storage systems (BESS) in Europe. The ...

Antares is the second largest storage project in the Netherlands. Set to go live by mid 2026, the project will stabilize the Dutch grid, reduce congestion, and integrate renewables ensuring a more sustainable energy ...

Vattenfall and the international energy storage company Return have entered into an agreement under which Vattenfall will operate and optimise a large-scale battery park with a capacity of 50 megawatts for eight years. The ...

A 100 MW / 200 MWh battery energy storage system in Waddinxveen, capable to power 50% of the city of

Expected ROI of hybrid renewable storage project in Netherlands 2026

The Hague, is set to go live mid 2026 and has a critical role in stabilizing the Dutch grid and accelerating ...

The study concludes with five policy recommendations designed to accelerate battery storage deployment and ensure energy systems are prepared to integrate high levels of ...

Here are the top renewable energy trends to watch in 2026. 1. Energy Storage Breakthroughs One of the biggest bottlenecks in renewable adoption is storage. In 2026, we'll see: Wider deployment of next-gen lithium ...

GIGA Storage, a Dutch and Belgian battery storage developer, has reached financial close for its utility-scale Battery Energy Storage System (BESS) project GIGA ...

ICRA, an Indian credit rating agency, expects India's installed renewable energy capacity (from solar, wind, large hydro and other RE sources) to increase to about 250 GW by March 2026 from 201 GW as of September ...

The growing need for sustainable energy solutions has propelled the development of Hybrid Renewable Energy Systems (HRESs), which integrate diverse renewable sources like solar, wind, biomass, geothermal, hydropower ...

The importance of co-location and hybrid projects in the energy transition Co-located or hybrid energy projects, which combine generation assets such as solar or wind with battery energy storage systems (BESS), play a crucial role in the ...

Credit: Vattenfall /Jorrit Lousberg. Haringvliet energy park is a hybrid energy park,integrating wind and solar plants and an energy storage unit into a single energy production site in the ...

18 October 2023 First CO₂ storage project in the Netherlands is launched Porthos has taken a final investment decision to develop the first major CO₂ transport and storage system in the ...

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, the sector continues to grow as developers ...

Battery cost declines: BloombergNEF expects lithium-ion battery prices to drop below \$100 /kWh by 2026, providing an additional lift for hybrid systems. Grid service revenue: ...
