

# Expected ROI of industrial energy storage project in India 2026

Will India's energy storage sector expand fivefold in 2026?

(ANI) India's energy storage sector will expand fivefold between 2026 and 2032, with sector receiving about Rs 479 thousand crore investment by 2032, according to an estimate by industry body India Energy Storage Alliance (IESA).

How big is India's energy storage sector?

India's energy storage sector is poised to attract an investment of Rs. 4,79,000 crore (US\$ 56.07 billion) by 2032, as per the India Energy Storage Alliance (IESA). The sector is projected to grow five-fold between 2026 and 2032, driven by the country's increasing need for energy storage solutions.

Will India's energy storage sector attract 479 lakh crore investment by 2032?

By the year 2031-32, the storage capacity demand is projected to increase to 73.93 GW (26.69 GW PSP and 47.24 GW BESS), with storage of 411.4 GWh (175.18 GWh from PSP and 236.22 GWh from BESS). India's energy storage sector is likely to attract INR 4.79 lakh crore investment by 2032, industry body India Energy Storage Alliance (IESA) said on Sunday.

What is the future of stationary energy storage in India?

The forecast was shared during the 5th Edition of the International Conference on Stationary Energy Storage India (SESI) 2025, recently held in Gandhinagar, Gujarat. The IESA noted that between 2026 and 2032, the sector is projected to grow five-fold, backed by policy momentum and private sector participation.

How will Gujarat's energy sector grow between 2026 and 2032?

The IESA noted that between 2026 and 2032, the sector is projected to grow five-fold, backed by policy momentum and private sector participation. Gujarat, which currently contributes over 30 GW of renewable energy, has targeted 100 GW by 2030--a move that is expected to further accelerate demand for storage solutions.

How much energy will India need by 2026-27?

The National Electricity Plan (NEP), projected that India will need an energy storage capacity of 16.13 GW (7.45 GW PSP (pumped storage project) and 8.68 GW BESS (battery energy storage system) with a storage capacity of 82.37 GWh (47.6 GWh from PSP and 34.72 GWh from BESS) by 2026-27.

The development of adequate energy storage projects remains important to integrate the growing share of RE with the grid, given their intermittent generation. ICRA expects the energy storage capacity requirement ...

ICRA expects the installed renewable energy capacity (including large hydro) in India to increase to about 250 GW by March 2026 from the level of 201 GW as of September ...

# Expected ROI of industrial energy storage project in India 2026

Executive Summary In this work we describe the development of cost and performance projections for utility-scale lithium-ion battery systems, with a focus on 4-hour duration ...

The VGF, combined with energy storage obligations and bidding guidelines for energy storage projects--whether standalone or integrated with renewable energy--is expected to advance the country's energy storage ...

Battery energy storage - a fast growing investment opportunity Cumulative battery energy storage system (BESS) capital expenditure (CAPEX) for front-of-the-meter (FTM) and behind-the-meter ...

"India"s energy storage sector is projected to expand five-fold between 2026 and 2032, attracting Rs 4.79 lakh crore investment by 2032. This strategic investment is the need of the hour to ...

Meanwhile, governments in other regions need to implement policies to encourage local energy storage development. 5. The U.S. BESS market is expected to reach \$10 billion by 2026, ...

BNEF forecasts energy storage located in homes and businesses will make up about one quarter of global storage installations by 2030. Yayoi Sekine, head of energy storage at BNEF, added: "With ambition the ...

By 2031-32, the storage capacity demand is projected to increase to 73.93 GW (26.69 GW PSP and 47.24 GW BESS), with storage of 411.4 GWh (175.18 GWh from PSP and ...

Industry experts stated that the strategic investment is the need of the hour to advance technological innovations and infrastructure required for a robust energy storage ecosystem in India.

New Delhi | 08 May 2024 -- In a significant step forward for India"s energy transition, the Delhi Electricity Regulatory Commission (DERC) has granted regulatory approval of India"s first ...

Lessons Learned from Emerging Economies The Supercharging Battery Storage Initiative would like to thank all authors and organizations for their submissions to support this publication. This ...

Reliance Industries has committed INR 75,000 crore (almost 9 billion USD) to establish an integrated manufacturing ecosystem for solar value chain, battery energy storage systems (BESS) and electrolyzers at Jamnagar, ...

The report indicates that Battery Energy Storage Systems (BESS) and Pumped Storage Projects (PSP) will form the backbone of this energy storage expansion. BESS capacity is expected to surge 375-fold to 42 ...

By the year 2031-32, the storage capacity demand is projected to increase to 73.93 GW (26.69 GW PSP and

# Expected ROI of industrial energy storage project in India 2026

47.24 GW BESS), with storage of 411.4 GWh (175.18 GWh ...

Not all energy storage technologies and markets could be addressed in this report. Due to the wide array of energy technologies, market niches, and data availability issues, this market ...
