

Expected ROI of residential ESS project in Canada 2025

Is Ontario a good place to invest in construction in 2025?

Ontario led the way in January, recording strong investment in both multi-unit residential and industrial construction. According to BuildForce Canada's latest Construction and Maintenance Looking Forward report, investment in 2025 is expected to remain relatively stable across most provinces.

Will the residential construction sector return to growth in 2025?

"A projected return to growth in the residential construction sector in 2025 will create further demands on the construction labour force into the late 2020s," says Bill Ferreira, Executive Director of BuildForce Canada.

How is the Canadian residential construction market segmented?

The Canadian residential construction market is segmented by type (apartments/condominiums and villas/landed houses), and by key city (Edmonton, Calgary, Toronto, Vancouver, Ottawa, Montreal, and Rest of Canada). The Report Offers Market Sizes (USD) and Forecasts for all the Above Segments. Need A Different Region or Segment?

How much money did building construction make in January 2025?

To illustrate this point, total investment in building construction rose 1.8 percent to \$22.1 billion in January 2025, compared to the previous month. The residential sector accounted for \$15.4 billion, while non-residential investment reached \$6.7 billion.

Will Saskatchewan's residential construction sector grow?

The outlook calls for Saskatchewan's residential construction sector to grow steadily across the forecast period. Demand for new housing increases in response to a young and growing population, while renovation growth is more modest, given the province's comparatively newer housing stock.

How will the housing market perform in 2025?

After remaining largely unchanged in 2025, investment in the residential sector is projected to chart a steady series of increases from 2026 to 2034. Activity is driven initially by strong demand for new-housing construction as interest rate pressures ease, and pent-up demand brings consumers back to the market.
