

Expected ROI of residential ESS project in Norway 2025

Is the Norwegian real estate market recovering?

Domestic investors were again active in the Norwegian real estate market, closing 80% of the total volume, and the all-equity investors were actively deploying more capital into real estate. The financing market is beginning to show signs of recovery, which is an important factor for the wider real estate investment recovery.

What happened to residential property in Norway in 2023?

During 2023, the total number of residential property transactions fell by 4.9% to 88,686 units, following a decline of 9.3% in 2022 and an increase of 7.1% in 2021, according to figures from Statistics Norway. By property type:

What happened to the Norwegian prime real estate market in 2024?

The Norwegian prime real estate investment market recovered somewhat in 2024, with secondary and tertiary markets lagging. However, there is still a large distance between buyers and sellers outside of prime markets.

What are the rental yields for residential properties in Norway?

Rental yields for residential properties in Norway are low to moderate, ranging from 2.32% to 6.51% in Q2 2024, with an average of 4.19%, according to research conducted by the Global Property Guide in June 2024. Surprisingly, larger properties offer higher rental yields as compared to smaller properties.

Is new construction economically viable in Norway?

Grocery is probably the only segment where new construction is economically viable. The outlook for the Norwegian hotel sector is positive, with higher transaction activity expected in 2025. Continued strong hotel performance, particularly in Troms and Bergen, is expected.

Is the Norwegian commercial real estate market facing a debt gap?

The Norwegian commercial real estate market is currently seeing a notable presence of forced sellers, primarily due to refinancing challenges. This trend is anticipated to continue into 2025, as many property owners confront a debt gap.
