

# Expected ROI of rooftop solar storage project in India 2026

Will solar capacity increase in India in 2026 & FY27?

New Delhi: Solar capacity additions in India will accelerate in the Financial Year (FY) 2026 and FY27, with 85-90 GW of new solar capacity expected to be added during these two years combined, according to a report by SBI Caps. The report adds that the additions of residential rooftop solar support the sector to drive the expansion.

What is the future of rooftop solar in India?

Rooftop solar, particularly in the Commercial & Industrial (C&I) segment, is expected to play a pivotal role in this growth. As of FY25, India's rooftop solar capacity stood at 17.02 GW, and increasing awareness among businesses about reducing operating costs and meeting sustainability targets is fuelling adoption.

How will India's rooftop solar capacity change in FY25?

As of FY25, India's rooftop solar capacity stood at 17.02 GW, and increasing awareness among businesses about reducing operating costs and meeting sustainability targets is fuelling adoption. Government incentives, reducing technology costs, and policy support such as net metering and PLI schemes are expected to further accelerate deployment.

What is the role of commercial & industrial (C&I) in rooftop solar?

The Commercial & Industrial (C&I) segment is expected to play a pivotal role in the growing rooftop solar installations across India. India's rooftop solar energy capacity is projected to surge, rising from 17 GW to an estimated 25-30 GW between FY25 and FY27. This growth showcases a strong momentum in the sector.

What is the projected growth rate of rooftop solar market?

The market is expected to grow at a CAGR of 33% from FY25 to FY27, with the total installed rooftop capacity projected to grow from 17 GW in FY25 to ~30 GW by FY27. Gujarat and Maharashtra together account for nearly 41% and 23% share, respectively, in the total installed capacity for rooftop solar.

How much solar capacity will be added in 2026 & FY27?

Solar capacity additions in the country will accelerate in the Financial Year (FY) 2026 and FY27, with 85-90 GW of new solar capacity expected to be added during these two years combined, according to a report by SBI Caps.

For example, in rooftop solar deployment, this includes site selection, project design, procurement of components such as solar panels, construction, commissioning and O&M.

For Prelims: India's rooftop solar (RTS), India's energy sector, photovoltaic panels Council on Energy, Environment and Water (CEEW), Ministry of New and Renewable Energy (MNRE), fossil fuels and energy

# Expected ROI of rooftop solar storage project in India 2026

imports, PM Surya Ghar ...

Buy solar systems at lowest price. Install solar rooftop to get lowest price and best quality solar panel, inverter, structure. Get a Solar Rooftop. Quality and subsidy assured. ...

Explore the cost and ROI of rooftop solar systems in India. Our guide breaks down installation expenses, savings, and financial benefits to help you decide on solar energy.

India Solar Rooftop Map | December 2024 India Solar Rooftop Map is an info-graphic report providing a snapshot of rooftop solar market in India - capacity addition across states and consumer segments, market share of ...

Join the Rooftop Solar Expo 2026 at the India Expo Centre in Greater Noida, Uttar Pradesh, India. This premier event will showcase the latest advancements in rooftop solar technology, ...

New Delhi: Solar capacity additions in India will accelerate in the Financial Year (FY) 2026 and FY27, with 85-90 GW of new solar capacity expected to be added during these two years combined, according to a report ...

In a significant stride towards clean energy, India's rooftop solar power capacity is set to grow substantially, reaching an estimated 25-30 gigawatts by the next financial year.

The India Energy Storage Alliance (IESA) projects a fivefold growth in the sector between 2026 and 2032, with investments expected to reach INR4.79 lakh crore by 2032.

Rooftop solar PV projects in India have gained significant momentum in recent years, driven by government policies, decreasing costs of solar technology, and increasing ...

Only 3 projects of the 32 tendered during the year were cancelled. The Solar Energy Corporation of India (SECI) discovered its lowest tariff of Rs 3.41 for its 1200 MW of solar+storage projects in July this year. This ...

TPREL is a developer of renewable energy projects (including solar, wind, hybrid, round-the-clock (RTC), peak, floating solar, and storage systems including battery ...

ICRA expects the installed renewable energy capacity (including large hydro) in India to increase to about 250 GW by March 2026 from the level of 201 GW as of September ...

India reported a record solar energy capacity addition of 24.5 GW in the Calendar Year 2024, almost double the capacity it added in CY23. However, it was not the utility-scale solar projects that spurred the growth of ...

## **Expected ROI of rooftop solar storage project in India 2026**

There are also rising solar stars today. India's comprehensive solar strategy - covered in a dedicated chapter (see p. 60) - is beginning to bear fruit. The most populous ...

India's rooftop solar initiative PM Surya Ghar Yojana is rapidly transforming the country's energy landscape as it is on track to install over 10 lakh by March 2025. In a statement, the Ministry of New and Renewable Energy ...
