

# Expected ROI of wind solar storage project in Chile 2026

How many energy storage projects are in Chile?

According to a December 2023 publication on the InvestChile website, the country had 23 approved energy storage projects with a total of 3,000 MW of capacity. Chile is exploring a variety of solutions to keep abreast of the changing energy demand landscape ranging from BESS to innovative projects using CO<sub>2</sub>.

How can Chile keep up with the changing energy demand landscape?

Chile is exploring a variety of solutions to keep abreast of the changing energy demand landscape ranging from BESS to innovative projects using CO<sub>2</sub>. In March 2024, BESS Coya, the largest battery-based energy storage system in Latin America, started operations.

How much energy will Chile have by 2026?

According to estimates of the national electric system of Chile (SEN) cited by Americas Market Intelligence, the country will have 13.2 GWh/2 GW (6-8-hour duration) of operating energy storage by 2026. The northern regions of Antofagasta and Atacama account for nearly 5GW of the BESS pipeline.

Why are solar PV projects being co-located in Chile?

More and more solar PV projects are co-located or hybridised with BESS in Chile as solar PV as standalone projects have become financially unviable in the country. One of the challenges Chile faces is the ever-increasing curtailment of solar PV and wind.

How many GW of solar & wind are there in Chile?

Around 9 GW of solar and wind have been commissioned in the country between 2019 and 2023, an Enerdata report dated April 2024 shows. The share of renewables in Chile's power mix has been growing at a fast pace and reached 58% in 2023.

How much battery storage capacity does Chile have?

According to data from Acera, the Chilean Renewable Energy Association, there are only 64 MW of battery storage capacity currently active, representing 0.2% of national capacity. AES Andes, a subsidiary of U.S. company AES Corp. operates all 64 MW at their Angamos and Los Andes substations.

The asset transfer is expected to take place following the project's commercial operation date, which is anticipated in the first half of 2026. Completion remains subject to ...

The government of Chile has announced plans to introduce a bill this year aimed at procuring large-scale energy storage systems. With an investment of \$2 billion, the initiative is set to commence operations in 2026

...

## Expected ROI of wind solar storage project in Chile 2026

Chile is now on track to become the second-largest battery market in the Americas, following the United States. As of this year, the Latin American nation has switched on 12 storage projects, with ...

In Jylland, Denmark, Hydro Rein and Commerz Real will develop two solar projects in the initial phase. A partnership for 2026 In Jylland, Hydro Rein and Commerz Real plan to build two solar projects with a capacity of 170MW and ...

Upcoming capacity payment and expected BESS revenues in Chile All Chilean energy storage players, ranging from IPPs to PCS providers, are now closely awaiting the publication of the capacity market decree (DS N 62) ...

In February, the company signed a 15-year PPA with independent power producer (IPP) Verano Energy for an 83MW solar PV and 660MWh BESS project, which is expected to be operational at the end of 2026.

Nine projects pairing solar or wind with energy storage submitted environmental impact assessments (EIAs) in Chile last month, totalling well over 2GWh of capacity, by companies including Engie, EDF and Sonnedix.

Founded in 2012, CIP focuses on investment in energy storage, transmission, and distribution; wind, solar, biomass, and advanced bioenergy; energy from waste; and power-to-X.

Located in the Valparaíso region, the projects will include 360 MW of energy storage to enhance grid reliability near Santiago. Construction of the first project, Ritoque ...

Canadian Solar's (NASDAQ: CSIQ) e-STORAGE division has secured a contract with Colbón to provide a 228 MW/912 MWh Battery Energy Storage System (BESS) ...

Chilean president Gabriel Boric (centre) at the inauguration of an energy storage plant in the northern region of Antofagasta in April 2024. Chile has strong conditions for wind and solar energy, and is pursuing storage to ...

Zelestra has secured \$282mn financing from Natixis CIB, BNP Paribas and BCI for its Aurora project, combining a 220 MWdc solar plant and 1 GWh storage capacity in the ...

A subsidiary of global power infrastructure group Glenfarne is acquiring more than 2 GW of dischargeable solar and battery storage capacity both operating and under ...

With commercial operations expected by the end of 2026, Domeyko is one of Chile's most innovative renewable energy projects, combining large-scale solar generation with ...

Spanish independent power producer Opdenenergy has won environmental approval for its Don Carlos

## **Expected ROI of wind solar storage project in Chile 2026**

solar-plus-storage project in Chile's Atacama region, according to a resolution published by the regional ...

The agreement includes the delivery of more than 200 Tesla Megapacks, making Celda Solar Colbun's first large-scale energy storage system and one of the largest in ...
