

# Factory solar storage project financing options in Mexico 2026

Can solar panels be used at night in Mexico?

Having a battery bank in your home to store the energy your panels produce during the day is a thing of the past, now you can feed the utility grid in Mexico during the day while your solar panels are generating and utilize the grid's energy during the night at no cost to you.

Should energy storage be a priority in Mexico?

If energy storage deployment is considered a priority in the following years, Mexico could accelerate investments through a mix of storage procurement targets and financial incentives. A strong storage market can also be built over time by offering rebates, loans, investment grants, tax credits or other financial incentives.

How can Mexico promote energy storage?

To accelerate investments and promote the formation of a storage market, Mexico should introduce technology-push and market-pull policies simultaneously. Procurement targets could be used if policymakers decided that energy storage is a short-term priority, as in the case of the US.

Should energy storage be regulated in Mexico?

5.2.1. Mexico Energy storage appears scarcely in Mexican legislation and the few regulations that mention it leave the door open to potentially consider EST as either generation assets or transmission and distribution assets. If EST were regulated as generation assets, they could operate under a regime of free competition.

Should energy storage be considered a transmission and distribution asset in Mexico?

In Mexico, defining energy storage as a generation or a transmission and distribution asset is not only critical to establish revenue streams, but also to determine whether EST will be able to operate under a regime of free competition.

How much money does KfW invest in solar-plus-storage projects?

In 2013, the state-owned bank KfW launched programme 275, which offered low-interest loans and investment grants for 30% of the capital costs of solar-plus-storage installations until 2016. In that period, KfW invested around EUR60 million in almost 19,000 of these projects.

The transferability market also faces challenges, further constraining financing options. Interest rates remain at their current levels through our outlook, resulting in a ...

It will also feature two battery storage systems with a 418 MW capacity, equivalent to four hours of energy generation. This will enable the project to supply clean energy continuously, even during periods where solar
