

Factory solar storage tender price in New Zealand 2025

How much does a solar battery cost in New Zealand?

The lowest price paid was \$8,000 for a 6 kWh battery, which implies that smaller systems can be more accessible for those on a budget. The best value was \$9,000 for a 9.6 kWh battery, equating to \$937.50 per kWh. Indicating the batteries below \$1000/kWh can be hunted down in the NZ market. What's Next for Solar Prices in 2025?

Will regulatory reforms reshape New Zealand's solar industry?

New Zealand's solar industry stands at a pivotal moment as regulatory reforms promise to reshape project economics and market opportunities. The Energy Competition Task Force's recent proposals signal a fundamental shift in how solar generation will be valued and compensated.

How much does a solar power system cost?

Average Price For A Solar Power System: The typical solar power system size from our dataset was a 7kW, the average cost for this system size was \$16,492. **Battery Systems Prices:** The average battery cost is \$1,249.79 per kWh, with smaller systems offering affordability and larger systems offering better value per kWh.

How much does a kW solar system cost?

Key Insight: Bigger systems offer better value per kW. While a 4kW system averages at \$2,601 per kW, an 11-12kW system drops to \$1,901 per kW, making larger installations a smarter long-term investment for households anticipating higher energy needs, like adding EV chargers or transitioning appliances from gas to electricity.

Are solar and battery systems a good investment?

Yes, solar and battery systems are a significant investment, but they're also a ticket to long-term energy independence and peace of mind. With low-interest loans from major banks, more Kiwis are taking the leap into renewable energy without the immediate financial pinch. Ultimately, investing in solar is about more than just the numbers.
