

Gel battery storage tender price in Guernsey 2025

Why did Guernsey increase electricity prices?

The decision comes after Guernsey Electricity (GEL) applied to the government for an increase of 9.5% because its long-term fixed-price agreements for the import of electricity are due to end. The STSB said the quarterly standing charges for households would rise from £68.25 to £86.75, the equivalent of about 95p per day.

Will Guernsey's energy price rises help pay off debts?

Guernsey Electricity (GEL) has warned customers to expect further price rises so it can pay off current debts and cover the costs of decarbonising the island. The firm said in its annual report new tariff increases would also help meet the costs of maintaining its infrastructure so energy supplies were "secure and reliable".

How much would a low-usage household spend on electricity in Guernsey?

Using the analysis, a typical low-usage household in Guernsey would spend £637 a year on electricity from July. Depending on the region, in Britain they could expect to save between £7 and £123 a year - between 1% and 19% less than Guernsey.

Is Guernsey a good place to buy electricity?

However, heavy electricity users are better off in Guernsey, with a high-usage household to spend on average £1,503 a year from July. The analysis showed British households could expect to spend between £42 and £244 more a year - up to 16% more.

How much does gel charge a quarter?

GEL's standing charge rose more than 380% between 2021 and July 2025 - from just under £18 to £86.75 a quarter. From July the standing charge is set to go from £68.25 to £86.75. Before 2022 GEL said 96% of its income came from charging people for using electricity - the unit charge.

Why did gel increase its energy tariffs?

The firm said in its annual report new tariff increases would also help meet the costs of maintaining its infrastructure so energy supplies were "secure and reliable". According to its accounts, GEL has more than £29m of bank loans, as well as other debts, that expose it to "higher debt financing costs" and "inflationary pressures".
