

# Government procurement price of commercial energy storage in Spain

How much money will Spain spend on energy storage projects?

Spain's ministry for the ecological transition said on Friday it will allocate EUR 700 million (USD 799.4m) in grants through competitive tendering to support large-scale energy storage projects in an effort to improve grid flexibility and integrate more renewables. Vanadium redox flow battery installed at the Son Orlandis solar farm in Mallorca.

How much money is available for energy storage projects?

A total of EUR700 million (US\$800 million) is available in the form of capex grants. It is open to standalone battery energy storage system (BESS) projects, thermal energy storage projects and pumped hydro energy storage (PHES) projects as well as those that are hybridised with renewable generation facilities.

How much money can a hybrid energy storage project get?

Each project can secure up to EUR15 million (\$15.68 million) in funding. From pv magazine Spain The Spanish government has announced a funding scheme for hybrid energy storage projects that generate electricity from renewable sources.

Which energy storage projects are eligible?

It is open to standalone battery energy storage system (BESS) projects, thermal energy storage projects and pumped hydro energy storage (PHES) projects as well as those that are hybridised with renewable generation facilities. Eligible costs include civil works, storage systems, auxiliary equipment and systems and related expenses.

What is the European Commission's new energy storage support scheme?

The European Commission approved a new support scheme. It targets large-scale energy storage projects in Spain. It focuses on technologies like standalone battery energy storage systems (BESS), pumped hydro energy storage (PHES), and thermal energy storage.

Does the capacity market guarantee the profitability of storage projects?

The capacity market is a mechanism designed to ensure the security of electricity supply, complementing revenues from generation, storage, and demand response. However, it should not be considered a tool to guarantee the profitability of storage projects.

The Institute for the Diversification and Saving of Energy (IDAE), an agency of Spain's Ecological Transition Ministry, has today launched a tender which offers EUR700 million ...

Energy sector stakeholders in Spain--including developers, investors, and infrastructure operators--face a critical year of legal and regulatory developments. Renewable generation is hindered by declining prices, lack
