

Government procurement price of containerized BESS in Ethiopia

What is the official source for Ethiopia government procurement?

The official source for Ethiopia government procurement is the Electronic Government Procurement (eGP) platform. It is managed by the Public Procurement and Property Administration Agency (PPPA) and provides access to tender notices, procurement information, and registration services for suppliers.

What are the benefits of bidding on Ethiopia tenders?

Bidding on Ethiopia tenders is beneficial for companies of all sizes. Ethiopia tendering authorities release contracts for most of the products and services they procure, providing opportunities for small, medium, and large enterprises. Some benefits of bidding on Ethiopia tenders are -

How much is the Ethiopian tender market worth?

The Ethiopian tender market is estimated to be worth around \$9 billion per year. The PPPA expects to expand the scope of the eGP platform to cover up to 80% of all government procurements within the next five years. Bidding for tenders in Ethiopia is extremely lucrative for companies of all sizes.

How do I access government procurement information?

Provide access to tender statistics, tender opening minutes, evaluation reports, contract awards, and other procurement information. Register your company in the national suppliers list to be able to identify government procurement opportunities and participate in tenders. Access registered companies from the national suppliers list.

How EGP can help you participate in government procurement?

The eGP platform avails various online services and solutions to help you participate in government procurement. Publish annual procurement plans of government agencies so that the business community gets prepared and respond more effectively. Access tender notices of various government agencies for the procurement of goods, services and works.

How much does Bess cost?

The cost of BESS has fallen significantly over the past decade, with more precipitous drops in recent years: This is nearly a 70% reduction in three years, owing to falling battery pack prices (now as low as \$60-70/kWh in China), increased deployment, and improved efficiency.
