

# Government procurement price of household energy storage in Greece

How many energy storage auctions are there in Greece?

Greece's energy regulator has announced three separate auctions for standalone energy storage systems connected to electricity transmission networks. The application process for the first auction, which involves 400 MW of energy storage, will be open until July 10.

What is Greece's energy storage program?

Greece's energy storage program will draw EUR341 million (\$372.3 million) from the European Union's post-pandemic recovery fund, which was approved last year by the European Commission. The program's first and second tenders will focus on standalone energy storage projects connected to the Greek electricity transmission network.

How much does energy storage cost in Greece?

For the first energy storage auction, the regulator has set a capped CfD price of EUR115,000 per MW per year. As a result, winning projects must participate in the energy market, such as Greece's wholesale electricity trading and secondary balancing services market. Each year, the government will assess the projects' market earnings.

Should Greece invest in energy storage facilities?

Currently there is a growing interest for investments in storage facilities in Greece. Licensed projects mostly consist of Li-ion battery energy storage systems (BESS), either stand-alone or integrated in PVs, as well as PHS facilities.

Which energy storage projects will be included in Greece's energy tenders?

The program's first and second tenders will focus on standalone energy storage projects connected to the Greek electricity transmission network. The tenders exclude the island network of Crete, which was linked to Greece's mainland power grid in 2021.

Will Greece allocate 1 GW of new energy storage capacity?

RAAEY - Greece's newly formed regulatory authority for waste, energy, and water - has revealed that the country will allocate 1 GW of new energy storage capacity. The program consists of three separate auctions, with capacities of 400 MW, 300 MW, and 300 MW.

How much does energy storage cost in Greece? For the first energy storage auction, the regulator has set a capped CfD price of EUR115,000 per MW per year. As a result, winning projects must ...

Auctions for energy storage are designed for stand-alone battery systems and work similarly to renewable energy auctions. Specifically, a price ceiling is set above which no offer can be submitted.
