

# Government procurement price of sodium ion battery storage in Sweden

Can sodium-ion batteries compete with low-cost Li-ion batteries?

Sodium-ion batteries are considered a promising substitute for Li-ion, but the timeline and conditions for achieving cost-competitiveness remain uncertain. This study evaluates their techno-economic potential, showing that while challenging, they could compete with low-cost Li-ion batteries by the 2030s under specific conditions.

Are sodium ion batteries a viable substitute for Li-ion?

Sodium-ion (Na-ion) batteries present a potentially viable near-term substitute for Li-ion for two primary reasons: (1) increased abundance and availability of sodium suggests lower prices and (2) drop-in compatibility with Li-ion manufacturing infrastructure suggests rapid scaling timelines.

Are sodium ion batteries a low-cost alternative to lithium-ion?

Provided by the Springer Nature SharedIt content-sharing initiative Sodium-ion batteries have garnered notable attention as a potentially low-cost alternative to lithium-ion batteries, which have experienced supply shortages and price volatility for key minerals.

Can sodium-ion energy density improve competitiveness against low-cost lithium ion variants?

Our modelled outcomes suggest that being price advantageous against low-cost lithium-ion variants in the near term is challenging and increasing sodium-ion energy densities to decrease materials intensity is among the most impactful ways to improve competitiveness.

Is battery storage a cost-effective and scalable solution?

Axel Holmberg, CEO at Ingrid Capacity, said, "Flexibility solutions, such as large-scale battery storage, have proven to be both a cost-effective and scalable solution."

How do infra funds help wind and solar projects in Sweden?

Infra funds like GreenVoltis play a key role in providing structured financing to improve project bankability and long-term profitability. An increasing number of wind and solar developers in Sweden are expanding into BESS project development, but grid constraints remain a significant hurdle. Limited grid connection capacity is slowing deployment.

\$14.5M: Series B for Sodium-Ion Battery Technology Altris (Uppsala, Sweden) closed a Series B round led by Clarios and Maersk Growth. Altris specializes in sodium-ion ...

Sodium-ion home energy storage systems are an emerging alternative to traditional lithium-ion batteries. These systems store energy from renewable sources like solar panels, allowing homeowners to use stored energy during ...

# Government procurement price of sodium ion battery storage in Sweden

Furthermore, the growing demand for battery energy storage systems for commercial applications and the decline in the prices of lithium-ion batteries are expected to ...

The energy storage sodium ion battery market size crossed USD 245.3 million in 2024 and is set to grow at a CAGR of 25.3% from 2025 to 2034, driven by rising demand for safer, thermally stable batteries that reduce fire and explosion risks ...

CBAK Power Battery Co., Ltd., a subsidiary of CBAK Energy Technology, is a leading Chinese manufacturer of high-performance lithium-ion and sodium-ion batteries. Established in 2001, they specialize in advanced ...

Battery Energy Storage Systems (BESS) paired with next-gen sodium-ion battery tech are playing an increasingly vital role in enhancing the reliability & efficiency of global power supplies, while potentially offering a ...

As battery costs continue falling 8% annually, these subsidies create a virtuous cycle. The real question isn't whether Sweden will achieve energy independence, but when - current ...

**SUMMARY** Batteries, widely used in the transport and energy sectors, are central to the global energy system. They will be key to the EU's clean energy transition, industrial future and ...

Sodium-ion batteries Altris secures funding to grow Europe's sodium-ion battery value chain While the excitement around sodium-ion battery technology has subsided with lithium-ion prices in free fall, some technology ...

Furthermore, the growing demand for battery energy storage systems for commercial applications and the decline in the prices of lithium-ion batteries are expected to generate growth opportunities for the market players.

Altris AB, founded in 2017 in Uppsala, Sweden, specializes in sustainable sodium-ion battery technology. Using abundant materials, their high-performance batteries offer enhanced safety, longer lifecycles, and flexibility for grid storage ...

The Sweden Battery Energy Storage Market is likely to experience consistent growth rate gains over the period 2025 to 2029. The growth rate starts at 8.52% in 2025 and reaches 13.62% by 2029.

In the short term, some analysts expect flat or even increasing pricing for battery storage. In addition, BNEF and others indicate changes in lithium-ion chemistry (e.g., switching from ...

Stockholm, Sweden - Northvolt today announced a state-of-the-art sodium-ion battery, developed for the

# **Government procurement price of sodium ion battery storage in Sweden**

expansion of cost-efficient and sustainable energy storage systems worldwide. The cell has been validated for a best-in-class ...

Recently, sodium-ion batteries have garnered significant attention as a potential alternative to lithium-ion batteries. With global giants like CATL and BYD investing in the ...

With sodium ion cells reaching commercialization, this thesis would like to explore the viability of commercial sodium ion cells through a bottom-up manufacturing and regional cost analysis of ...
