Why did the IESO invest in energy in Ontario?

Given Ontario's need for capacity (ie, MW available to provide energy when needed, as opposed to energy into the grid), the IESO focussed their first and second procurements on filling this need. The IESO issued the largest storage-based procurement in Canada in February 2023 with the Expedited Long-Term 1 RFP (the ELT1).

What is Public Services & Procurement Canada (PSPC)?

Public Services and Procurement Canada (PSPC) supports federal departments and agencies in their daily operations as their central purchasing agent, real property manager, treasurer, accountant, pay and pension administrator, integrity advisor, common service provider and linguistic authority.

What are the key pricing considerations in a procurement strategy?

Key pricing considerations are in place to ensure that a pricing strategy is effective. To that end, a pricing strategy must support the achievement of a procurement's objectives in a way that delivers value to Canada. The pricing objectives need to be agreed upon and clear to all stakeholders.

What is the practitioner's guide for procurement pricing?

The Practitioner's Guide for Procurement Pricing (the Guide) is not intended to prescribe pricing to contracting officers but rather to aid them in the application of their professional judgement when making pricing decisions.

How much control does a provincial government have over the energy sector?

While the degree of control exerted by the provincial government with a vertically integrated Crown corporation is almost absolute, provinces with an open market also continue to exert a high degree of control over the energy sector as a manner of provincial policy.

This approach is not new and is the preferred procurement approach in the solar industry. You rarely see utility customers procuring solar panels and inverters from the same ...
