

# Home battery pack project financing options in Australia 2026

What is Australia's cheaper home batteries program?

From 1 July 2025, the Australian Government's Cheaper Home Batteries Program is providing around a 30% discount on the cost of installing a battery as part of an expansion to the SRES. Rebates and loans are also provided by some state and territory governments and local councils.

How will Australian government fund solar batteries?

The Australian Government will fully fund the discount for solar batteries by purchasing small-scale technology certificates (STCs). This means no costs will be passed on to householders through energy retailers. Household batteries will assist in balancing electricity supply and demand across the whole grid.

What is the \$2.3 billion cheaper home batteries program?

**\$2.3 Billion Initiative to Drive Renewable Energy Adoption** The Labor government has unveiled a \$2.3 billion Cheaper Home Batteries Program, designed to encourage Australian households to embrace renewable energy solutions.

Are solar batteries the future for Australian homes?

With rising energy prices, grid instability, and increased demand for sustainable living, solar batteries for the home is no longer a future concept, it's fast becoming the standard for Australian households.

How does battery storage benefit Australian families?

Battery storage helps Australian families make the most of their solar by saving unused energy for later use. Save with a battery: Need help choosing the right battery or installer? Request a call back Brighte approved my \$3,000 loan within minutes. The installation went very smoothly and the system proved to be everything I expected and more.

What is a home battery program?

The program provides financial incentives for households to install home battery systems, enabling them to store solar energy and reduce reliance on the grid. By supporting the adoption of renewable energy technologies, the initiative seeks to lower household energy bills while contributing to Australia's climate goals.
