

Home battery pack supplier quotation in France 2026

How much will a battery cost in 2026/27?

That trend is expected to continue. In 2026/27, the average pack price is expected to fall below \$100/kWh, based on raw material costs, competition, and pressure from alternative technology such as Na-ion batteries, which could be 30% cheaper than LFP devices when production of the former is scaled up.

Is the battery industry a real challenge in France?

The structuring of an innovative and competitive industry covering the entire battery value chain is a real challenge, and one to which the French government and a number of companies are fully committed.
