

Hybrid solar storage project financing options in Indonesia 2025

How much solar energy investment in Indonesia has doubled in 2021?

Alvin Putra Sisdwingraha, Lead Author of ISEO 2025 and IESR's Electricity and Renewable Energy Analyst, revealed that solar energy investment in Indonesia has doubled, from USD 68 million in 2021 to USD 134 million in 2023.

Which international development finance institutions have backed solar and wind projects?

International development finance institutions have backed most large-scale solar and wind power projects developed to date. In 2018, the Asian Development Bank signed a \$161 million loan package with Vena Energy to finance Vena Energy's solar and wind project portfolio in Indonesia.

What is Indonesia doing with its energy storage capacity?

Indonesia is currently building on its storage capacity through the planned/ongoing installation of 5 MW battery energy storage systems (BESS), linked to PLN's renewable sites. Indonesia is also building its first utility-scale integrated solar and energy storage project in Nusantara.

Could Indonesia adopt a simple approach to solar-plus-storage?

Indonesia could adopt a similarly simple approach to procuring solar-plus-storage. RUPTL 2019-28 estimates that Indonesia will need to install 3.2GW of rooftop PV to raise renewable penetration above 23% from 2025-28, although there is no specific deployment plan by PLN.

How can Indonesia accelerate the adoption of energy storage?

IESR urges the Indonesian government to accelerate the adoption of energy storage, among others, by first improving the regulatory framework and establishing legal certainty to provide adequate compensation for ESS developers, reduce development risks, and boost investor confidence.

Can mini-grids improve energy access in Indonesia?

Source: Institute for Essential Services Reform, BloombergNEF. Improving energy access through rural mini-grids: Mini-grids using distributed solar can provide energy access to some 2.3 million Indonesian households that currently lack energy access. They could also improve grid reliability.

After debt payments have been made, other investors (like equity investors) will be paid. In general, project's assets are used as collateral to the loan. This type of financing is common in renewable energy projects because building solar, ...
