

Why are battery storage options more suitable in Spain?

As a result, shorter duration storage options like batteries are more suitable in Spain. In Spain, over 50% of excess renewable energy occurs in periods where there is continuous excess for less than 12 hours i.e. a battery that chooses to charge on this energy would be able to discharge within 12 hours.

Will Spain get 20GW of new energy storage by 2030?

Spain is targeting 20GW of new energy storage by 2030. MITECO also launched a similarly-sized grant scheme specifically for co-located or hybridised energy storage projects, for which proposals were due in March 2023. Enel Green Power submitted two projects during the first quarter which fit the criteria, totalling 60MWh and 38MWh respectively.

What is Spain's energy storage program?

For stakeholders in battery storage, thermal storage, and pumped hydro, this program offers not only financial backing but also long-term stability and political support. Spain has launched a EUR700 million energy storage program to support battery, thermal, and pumped hydro projects, aiming to deploy 2.5-3.5 GW of capacity.

Can energy storage projects get 85% co-financing?

Standalone and renewables-plus-storage battery projects can apply for up to 85% co-financing, along with pumped hydro and thermal energy storage sites. Friday saw the publication of a call for applications for energy storage projects hoping to receive support from a EUR700 million (\$794 million) EU-funded program in Spain.

How has Spain strengthened its energy infrastructure?

Spain has taken a decisive step in strengthening its energy infrastructure with the launch of a EUR700 million support scheme aimed at expanding large-scale energy storage across the country.

Is Spain ready for a grid-scale storage program?

With a July 15 deadline, the program is expected to attract interest from across the continent, particularly as the European storage market gains momentum. As of early 2025, Spain has roughly 1 GWh of grid-scale storage under construction, according to industry sources.

The Zaragoza plant of globally recognized automotive manufacturing giant Stellantis is partnering with CATL, the world's largest manufacturer of electric vehicle batteries, to expand its automotive battery ...

Lithium Battery Conferences in Spain 2025 2026 2027 is for the researchers, scientists, scholars, engineers, academic, scientific and university practitioners to present research activities that ...

Spain PowerCo, a subsidiary of Volkswagen Group, is moving ahead rapidly with its battery cell gigafactory project, set to begin foundational work and erect its first pillars this autumn. The plant, expected to employ ...

Enlight expands its successful Gecama Wind Project, transforming it into the largest hybrid power complex of its kind in Spain. The project combines wind, solar, and utility ...

The aid is targeted at various storage technologies, including stand-alone battery systems, reversible pumped hydro, thermal storage, and hybrid systems integrated with ...

The Envision Energy factory in Spain will develop and manufacture the latest generation of lithium iron phosphate (LFP) battery products, with production expected to begin ...

Horizon Europe project leader seeks partners to develop an energy storage system for a high demanding electricity consumption industrial process that will be powered ...

May 19, 2023: The European Commission said on May 11 it had approved an EUR837 million (\$909 million) Spanish aid scheme to finance battery production. Under the scheme, companies producing batteries and related essential ...

The general principles of project finance that apply to the financing of solar and wind projects also apply to energy storage projects. Since the majority of solar projects ...

Targeted to start production by end of 2026 at Stellantis' Zaragoza, Spain site, the facility could reach up to 50 GWh capacity, subject to the evolution of the electrical market ...

Spain is emerging as a key player in Europe's lithium-ion battery industry, driven by the growing demand for electric vehicles (EVs), renewable energy storage, and industrial applications. With ...

The general principles of project finance that apply to the financing of solar and wind projects also apply to energy storage projects. Since the majority of solar projects currently under construction include a storage ...

Xcel's projects will include battery energy storage, onsite renewables and thermal backup generators. Called Empower Resiliency, the utility will provide a turnkey solution and finance the upfront cost.

The Spanish government has approved a new financing tool under its recovery and resilience facility aimed at supporting projects and initiatives in the areas of renewable energy, green hydrogen and energy ...

Revised February 13, 2023 Below are slides the authors prepared about tax credit opportunities and development challenges for battery storage. Tax benefits available after passage of the IRA: What is storage? ...

The main demands of the Association of European automotive and industrial battery manufacturers (Eurobat) focus on strengthening support for innovation in all mainstream ...
