

Industrial battery cabinet tender price in Greece 2026

Will Greece provide a quota for battery projects in 2024?

Before the end of 2024, Greece intends to provide subsidies for standalone battery projects of 200 MW in total via the third auction. The Ministry of Environment and Energy issued a decree determining the available operating power quota.

When will a battery storage project be up and running in Greece?

The awarded projects must be up and running by the end of April 2026, according to RAAEY. Greece awarded 400 MW and 300 MW of battery storage projects in earlier auction rounds held in 2023 and 2024. Marija has years of experience in a news agency environment and writing for print and online publications.

How many projects have been awarded in Greece's first battery energy storage system?

The Greek Regulatory Authority for Energy has confirmed that 411.8 MW of projects have been awarded in the country's first standalone battery energy storage system (BESS) tender, which has attracted huge interest among developers. Investment and operating aid will be granted to 12 projects put forward by seven proponents.

Do hybrid batteries lose access to renewables auctions?

As in Spain, hybrid projects with co-located batteries that charge from the grid lose access to renewables auctions, however this has not deterred projects applying for 11B licenses.
