

# Industrial energy storage project financing options in Germany 2026

Who developed the new battery storage projects in Germany?

The projects were developed by TotalEnergies affiliate Kyon Energy. Credit: JeanLucIchard/Shutterstock. TotalEnergies plans to invest EUR160m (\$172.8m) in six new battery storage projects in Germany, totalling 221MW of capacity. The projects have been developed by TotalEnergies affiliate Kyon Energy.

When will the Stendal battery energy storage project be fully operational?

The 209 MWh Stendal battery energy storage project is expected to be fully operational by early 2026, one year before its seven-year tolling agreement comes into effect.

Does Nofar energy have financing for Stendal Bess project?

Israeli developer and independent power producer Nofar Energy has secured EUR 86.5 million (\$92.5 million) in project financing from NORD/LB for its 104.5 MW /209 MWh Stendal BESS project in Germany. The Stendal project is backed by a seven-year fixed-price flexibility purchase agreement (FPA).

Why did totalenergies develop a new storage capacity in Germany?

The development is a key step in TotalEnergies' efforts to enhance the flexibility of Germany's power system. The new storage capacity will help mitigate congestion and provide the necessary flexibility to support the rapid expansion of the country's renewable energy sector.

Who develops a new energy storage project?

The projects have been developed by TotalEnergies affiliate Kyon Energy. Most will utilise next-generation batteries from another TotalEnergies affiliate, Saft. Siemens Gamesa-Hamburg-Altenwerder - Electrothermal Energy Storage ...

When will a new battery storage project be commissioned?

The projects, with a total capacity of 221MW, are expected to be commissioned in early 2026. The projects were developed by TotalEnergies affiliate Kyon Energy. Credit: JeanLucIchard/Shutterstock. TotalEnergies plans to invest EUR160m (\$172.8m) in six new battery storage projects in Germany, totalling 221MW of capacity.

For many years pumped hydro storage projects were almost the only electricity storage technology. They still make up the largest share of the electricity storage capacity in Germany; about 30 projects commissioned ...

Introduction to BESS Battery Energy Storage Systems (BESS) are advanced technologies designed to store energy generated from various sources, such as solar and wind, for later use. They operate by charging ...

Why Energy Storage Projects Struggle to Secure Funding Did you know 43% of renewable energy developers

abandoned energy storage projects in 2023 due to financing hurdles? The ...

Germany is preparing for its first auctions of long-duration energy storage (LDES) systems, targeting 2025 and 2026. The initiative aims to support the integration of renewable energy into...

The project financing agreement concerns the Stendal battery energy storage initiative, Nofar's first in the country, located in the eastern German state of Saxony-Anhalt. The facility is expected to become fully ...

Backed by shareholder Commerzbank, the Fund marks its inception by committing EUR 50 million to a ready-to-build grid-connected battery energy storage system in Germany, with a power capacity of 56 MW and an ...

As such, we're providing this "Cheat Sheet for Energy Storage Finance" based on our work as buy-side and sell-side investment bankers experienced in both energy storage venture capital and project finance. I'm also including some ...

Global law firm Clifford Chance has advised Nofar Energy, a global leader in renewable energy investments, on the project financing of its first battery energy storage ...

In autumn 2024 two draft regulations were published regarding state aid for large-scale electricity storage systems (BESS), one from the Modernisation Fund ("MF ") 1 - and the second under the National Recovery ...

TotalEnergies, on the occasion of Patrick Pouyann's participation in the Europe 2025 conference in Berlin, and in connection with the company's integrated development in ...

This diverse group of stakeholders underscores the growing support for energy storage as a critical component of the future energy infrastructure. Mufasa stands out as the largest utility-scale battery storage ...

Germany is starting a EUR100 billion green investment initiative In the race for a net-zero future --Germany's latest EUR100 billion climate investment package is so large it has been dubbed a ...

Battery storage project financings tend to have finance documents which mirror those seen in a renewables project financing, though they raise a number of additional issues, ...

Explore the comprehensive conference program at Energy Storage Germany 2026. Gain insights from industry experts on the latest trends in energy storage technology and innovation.

BNEF forecasts energy storage located in homes and businesses will make up about one quarter of global storage installations by 2030. Yayoi Sekine, head of energy storage at BNEF, added: "With ambition the ...

The second, bigger obstacle to the project financing of storage assets is that the revenue stack for batteries is more complicated than for generating assets. Unlike wind and solar projects, ...
