

LFP battery system project financing options in Norway 2025

When will LFP battery production start in Norway?

The company has adjusted its schedule for starting LFP battery production to Q3 2025, involving an additional investment of NOK 100 million. Innovation Norway has provided substantial support with a NOK 1.5 billion loan facility to advance the company's manufacturing capabilities.

When will Morrow batteries start producing LFP batteries?

In early 2024, Morrow Batteries announced significant developments in their production timeline. The company has adjusted its schedule for starting LFP battery production to Q3 2025, involving an additional investment of NOK 100 million.

What is the future of LFP batteries?

According to a report by market research firm TrendForce, LFP batteries are expected to account for more than 60 percent of the global power battery market installed base by 2024 due to their cost-performance advantage.

Where are LFP batteries made?

Headquarters: Arendal, Norway
Leadership: Chairperson Liv Monica Stubholt; CEO Lars Christian Bacher
Facilities Morrow Cell Factory (MCF): Europe's first gigafactory for LFP (Lithium Iron Phosphate) batteries located in Arendal
Morrow Research Centre (MRC): Located in Grimstad
Sales Offices: Norway and Germany

What are LFP batteries?

Their LFP batteries offer advantages in cleaner sourcing, reduced costs, and extended cycle life, making them suitable for energy storage systems and other applications. The company's LNMO technology represents a significant advancement, replacing cobalt with manganese to create more sustainable and affordable batteries.

What are Morrow batteries doing now?

Morrow Batteries ("Morrow") is implementing strategic measures to secure start-up of production of commercial LFP batteries, deliver additional sales contracts, and advance its proprietary battery technology at its research centre in Grimstad. Other projects will be postponed to concentrate on core activities that drive immediate value creation.

1. Germany: The Industrial Powerhouse Policy Framework National Battery Strategy: EUR2.4 billion allocated for LFP-related R& D through 2030
Automotive Mandates: ...

LG to Produce LFP Batteries for ESS in USA
LG Energy Solution plans to start mass production of lithium iron phosphate (LFP) batteries for energy storage systems (ESS) in the United States in the second half of ...

LFP battery system project financing options in Norway 2025

Norwegian industrial battery technology company Morrow Batteries ASA has been granted a loan of NOK 1.5 billion (USD 134m/EUR 128m) from state-run agency ...

LFP Battery Disadvantages Lower energy density, meaning less range or a larger battery pack is needed. Slower DC fast charging, but this may depend on the vehicle's cooling ...

The company's \$3 billion BlueOval Battery Park Michigan is set to revolutionize American manufacturing, bringing critical LFP battery production home and creating thousands ...

Tesla is charging toward a major milestone in its quest for battery dominance. On June 28, 2025, the company announced that its first North American lithium iron phosphate (LFP) battery manufacturing facility, located in ...

This paper presents a systematic approach to selecting lithium iron phosphate (LFP) battery cells for electric vehicle (EV) applications, considering cost, volume, aging ...

The system delivers: Stable & Efficient Power Conversion with 100kWh PCS Reliable Long-Term Energy Storage with 200kWh LFP battery Modular Design for easy expansion and scalability ...

Executive Summary In this work we describe the development of cost and performance projections for utility-scale lithium-ion battery systems, with a focus on 4-hour duration ...

This work incorporates base year battery costs and breakdowns from (Ramasamy et al., 2022) (the same as the 2023 ATB), which works from a bottom-up cost model. Base year costs for ...

EUR150 Million Financing for Gruppo Seri's Lithium Battery Gigafactory: A Strategic European Investment In April 2025, Gruppo Seri secured EUR150 million in syndicated financing ...

Explore the latest advancements in Lithium Iron Phosphate (LFP) batteries, including safety breakthroughs, high-performance applications, and their role in sustainable ...

Hyundai and Kia eye cheaper EVs with LFP battery tech Hyundai and Kia launched a new project to develop lithium iron phosphate battery cathode material for future EV models.

Morrow Batteries ("Morrow") is implementing strategic measures to secure start-up of production of commercial LFP batteries, deliver additional sales contracts, and advance ...

Setting performance and data standards and financing R& D for design innovation that prioritizes disassembly and recyclability alongside safety, cost and range. ne, whether a battery can and ...

LFP battery system project financing options in Norway 2025

At a time when many green industrial projects are struggling, Morrow has secured government support through loans from Innovation Norway and achieved significant ...
