

LFP battery system tender price in Bulgaria 2026

How much does a battery cost in Bulgaria?

Currently, Bulgaria's electricity market offers an opportunity for EUR110 (\$122) per MWh profit on battery energy storage with two hours of discharge capacity using energy arbitrage. Rystad Energy 's analysis estimates battery system costs at a flat EUR60 (\$67) per MWh.

How much money does the Bulgarian Energy Ministry provide for energy storage?

The Bulgarian Energy Ministry opened a tender procedure for supply of energy storage on August 21,2024. The procedure aims to provide funding for construction and implementation of a 3,000 MWh stand-alone battery storage facility. The total amount of the grant that can be provided under the procedure is EUR590 million (\$536 million).

What can boost battery storage in Bulgaria?

Another development that can boost battery storage in Bulgaria is a recent update of national legislation to include battery energy storage systems as a component of the grid.

How much battery energy storage capacity does Bulgaria have?

Bulgaria has installed between 40 MWh and 50 MWh of battery energy storage capacity to date. However, new national legislation as well as funds provided through the European Union's Recovery and Resilience Facility (RRF) could add another 1 GWh of storage capacity over the next two years.

How much money will be invested in Bulgaria's electricity system?

Energy minister Vladimir Malinov said the investments, worth up to BGN1,153,939,700 (US\$657.4 million) "will guarantee the security and stability of the Bulgarian electricity system." Tender bids must be submitted electronically, with more information available on this portal.

How much money does the NRRP provide for energy projects in Bulgaria?

Under the RESTORE initiative, launched through Bulgaria's National Recovery and Resilience Plan (NRRP), the Ministry of Energy has selected 82 projects that will collectively receive BGN 1.15 billion (approximately \$675 million) in public funding.

X-BESS includes a battery management system developed by IPS. The company mainly uses European parts and the lithium-iron-phosphate (LFP) battery cells are from China. The battery management system (BMS) is ...

Fresh and verified Tenders from Bulgaria. Find, search and filter Tenders/Call for bids/RFIs/RFPs/RFQs/Auctions published by the government, public sector undertakings ...

LFP battery system tender price in Bulgaria 2026

Bulgaria has called for applications in a tender process for about 3 GWh of energy storage capacity in the country. The scheme was announced earlier in June this year. ...

A BESS facility of 124.1 MW in operating power was inaugurated in Lovech in Bulgaria. Located next to a photovoltaic park within Balkan Industrial Park, it is part of the ...

That trend is expected to continue. In 2026/27, the average pack price is expected to fall below \$100/kWh, based on raw material costs, competition, and pressure from alternative technology such as Na-ion ...

In the field of lithium-ion batteries, a key distinction is made between lithium nickel manganese cobalt oxide (NMC) and lithium iron phosphate (LFP). NMC has been for many years the ...

The new system also signals the beginning of Bulgaria's national plan to reach 10 GWh of battery storage capacity within the next year. A recent capacity tender has already allocated nearly 9,713 MWh to upcoming ...

Lithium Iron Phosphate (LFP) batteries are leading the global battery market with their unmatched safety, cost efficiency, and performance. Their rapid adoption across electric vehicles and ...

China's independent power producer CGN New Energy has announced the results of its 2025 procurement for lithium iron phosphate (LFP) battery energy storage systems, which will be installed alongside solar and ...

A call for new energy storage capacity in Bulgaria has awarded 9,712.89 MWh of projects with a total investment value of BGN 1.149 billion (USD 675.8m/EUR 587.5m), the Balkan country's energy ministry said on Thursday.

LFP battery prices remained stable, while prices for ternary batteries saw a slight decline. The energy storage systems (ESS) market maintained strong seasonal demand, with an increase in shipments of large ...

Lithium battery prices fluctuate due to raw material costs (e.g., lithium, cobalt), manufacturing innovations, geopolitical factors, and demand surges from EVs and renewable ...

According to a recent analysis, the average price of lithium-ion battery packs for electric vehicles fell by 20 per cent to USD 115 per kilowatt hour in 2024 - the sharpest price drop since 2017. The USD 100/kWh mark could ...

The tender, covering supply, system design, installation guidance, 20-year maintenance, and safety features, targets systems to be built in 2025-2026. That's an astounding price, as earlier ...

The landscape of electric vehicles in 2026 will be shaped by a remarkable convergence of advanced battery

technologies, driving gains in performance, sustainability, and affordability.

A BESS facility of 124.1 MW in operating power was inaugurated in Lovech in Bulgaria. Located next to a photovoltaic park within Balkan Industrial Park, it is part of the country's first closed licensed power ...
