

# Lithium ion storage project financing options in Finland 2025

What is the EIB-led credit package for lithium production in Finland?

EIB-led credit package of EUR150 million development of lithium production in Finland for the EU. Lithium is critical raw material for the electrification of transport. Sibanye-Stillwater's Keliber lithium project aims to become EU's first integrated lithium hydroxide producer dedicated to supplying the European market directly.

What does the green financing package mean for Keliber lithium?

"The EUR 500 million green financing package is a key milestone for the Keliber lithium project. The package provides cost-effective funding to complete the development of the unique Keliber lithium project, aiming to be the first integrated battery-grade, high-purity lithium operation in Europe.

What is the Keliber Lithium Project?

"To Finnish Minerals Group, the Keliber lithium project is a flagship project, which we as an anchor owner have advanced since 2018 and later on in cooperation with our partner, Sibanye-Stillwater. The project has already taken determined steps forward with the construction of the refinery and mining sites.

HELSINKI, April 29 (Xinhua) -- Chinese and Finnish companies broke ground Tuesday on Finland's first lithium-ion battery cathode active material (CAM) plant, a project ...

The majority owner of the Keliber lithium project, Sibanye-Stillwater, has today announced a green loan financing facility, which enables the construction phase of the Keliber ...

Financing energy storage projects using lithium-ion batteries presents several key challenges. Here are some of the main issues: Main Challenges in Financing Energy ...

With developers continuing to add new capacity, including 9.2 GW of new lithium-ion battery storage capacity in 2024 through November 2024 and comparable levels of growth expected ...

Explore the biggest lithium miner and cobalt mining companies in Australia for 2025, highlighting their pivotal roles in global battery supply, clean energy, and technological ...

Financing energy storage projects using lithium-ion batteries presents several key challenges. Here are some of the main issues: Main Challenges in Financing Energy Storage Projects 1. Technology Risks New ...

The International Energy Agency (IEA) said last month that grid-scale energy storage is now the fastest-growing of all energy technologies. It estimates that 80 gigawatts of new energy storage capacity will be added in ...

# Lithium ion storage project financing options in Finland 2025

NW secures EUR430 million non-recourse financing for its storage projects in France and Finland NW announced today that it has secured EUR 430 million in non-recourse bank financing from international banks Santander CIB ...

Lithium-ion batteries (LIBs) have become a cornerstone technology in the transition towards a sustainable energy future, driven by their critical roles in electric vehicles, portable electronics, ...

The package provides cost-effective funding to complete the development of the unique Keliber lithium project, aiming to be the first integrated battery-grade lithium operation in Europe.

By 2030, the global energy storage market is projected to grow at a compound annual growth rate (CAGR) of 21%, with installed capacity expected to reach 137 GW (442 GWh). The rising focus ...

As Finland's energy transition accelerates, one thing's clear: the country isn't just building storage projects - it's engineering the template for cold-climate renewable integration worldwide.

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, ...

This financing solution complements Keliber's existing financial arrangements for the construction and development of its lithium refinery, concentrator, and mining areas in ...

Both the US and global energy storage markets have experienced rapid growth over the last year and are expected to continue expanding rapidly in order to support grid resiliency. Through 2030, the global ...

Finnish Minerals Group invests EUR 54 million in Keliber's lithium mine and hydroxide refinery project We strengthen European lithium production by participating in Keliber's financing.
