

# Microgrid storage project financing options in Poland 2026

Will energy storage subsidy programs accelerate Poland's energy transition?

The development of energy storage subsidy programs in 2024-2025 has great potential. The planned activities will accelerate Poland's energy transition, supporting the development of technologies and the creation of new jobs in the energy sector. Energy storage subsidy programs are crucial to stabilizing Poland's electricity grid.

How can energy storage facilities be improved in Poland?

Introduction of preferential loans for companies investing in energy storage facilities. Increasing the installed capacity of energy storage facilities by 300% by the end of 2025. Increasing the share of RES in Poland's energy mix to 35% in 2025. Reduction of CO2 emissions by 15 million tons per year.

How much money will Poland receive from the modernization fund?

Funding for the program comes from the Modernization Fund (FM), which underscores the importance of the project for modernizing the energy system. By 2030, Poland could receive about 60 billion zlotys from the FM for energy transition goals. The call for applications runs from June 17, 2024 to June 16, 2025, or until funds are exhausted.

How to apply for a micro wind project in Poland?

In the first call, the available pool is PLN 50 million. Applications can only be submitted online using the Grant Application Generator available on the program website. The program supports the development of Polish companies and academia in the field of micro wind installations.

Are subsidies available for energy storage facilities?

Subsidies are available for energy storage facilities, as long as they are integrated with the energy source being implemented as part of the investment. The program provides support covering up to 20% of eligible costs. The continuation of both programs is planned with a larger budget.

How will the energy storage industry evolve in 2024-2025?

A rapid increase in the number of energy storage installations is expected in 2024-2025. This will be an important step in modernizing the Polish energy sector and strengthening the position of prosumers in the market.

A total of PLN 4 billion (\$1 billion) will be distributed under the subsidy scheme by the end of 2025 in a bid to bring online more than 5 GWh of energy storage projects by 2028.

In autumn 2024 two draft regulations were published regarding state aid for large-scale electricity storage systems (BESS), one from the Modernisation Fund ("MF ") 1 - and the second under the National Recovery ...

# Microgrid storage project financing options in Poland 2026

As such, we're providing this "Cheat Sheet for Energy Storage Finance" based on our work as buy-side and sell-side investment bankers experienced in both energy storage venture capital and project finance. I'm also including some ...

New project finance models and a favourable regulatory environment will be key to transforming and unlocking the energy storage market. Innovative financing mechanisms ...

In the second quarter of 2025, Statkraft Poland achieved a major milestone in the development of battery energy storage systems. The Norwegian renewable energy leader now has projects with confirmed grid ...

Sharp's Energy Systems & Services Group expects to finance more than 12 MWs worth of hybrid commercial and industrial (C& I) &#168;solar plus storage&#168; projects in the next 12 months.

In our view, there is a need for greater collaboration between sponsors developing the batteries, regulators and national policymakers setting renewable targets, and the financing community ...

Explore Poland's M&#243;j Prad 6.0 program offering PLN 400 million in funding for solar installations and energy storage. Learn about eligibility, application details, and the ...

Based on member input, the MSWG developed two companion briefing papers to answer key questions about microgrids: (1) User Objectives and Design Approaches for Microgrids: ...

As expected, Poland's latest capacity market auctions have highlighted a significant shift towards the battery energy storage systems (BESS) beside the fact that the de-rating factor has been significantly decreased. The ...

The European Commission (EC) has greenlit Poland's USD 1.2bn scheme for projects to increase electricity storage capabilities to foster the transition to a net-zero economy ...

The most advanced energy storage project in the PGE Group's portfolio is the Zarnowiec Energy Storage Facility. With a power output of 262 MW and a storage capacity of around 981 MWh, ...

What are the different types of energy storage systems? o Microgrids: in isolated or remote areas, solar and wind systems can be combined into a microgrid, which can operate independently of ...

Federal Funding for Microgrids and DERs is Disappearing. Here are Some Other Funding Options While federal funding for microgrids and distributed energy resources (DER) is shrinking, microgrid seekers-especially ...

In this article, we will explore the key questions related to microgrid financing and investment, the various

funding options available for microgrid projects, and how project ...

Expected to go live by 2029, the project is the first in Poland to receive energy storage certification, marking a milestone in battery storage technology development. The European ...
