

Mobile ESS unit supplier quotation in Finland 2030

What are the trends in the ESS market?

The ESS market is witnessing several notable trends. Battery storage systems have seen rapid cost reductions and efficiency improvements, making them more accessible for both residential and commercial use. For instance, in Australia, one in five new solar panel owners now installs a battery, a significant rise from one in twenty in 2021.

What is Europe's ESS market like in 2022?

Europe's ESS market is characterized by significant growth, propelled by ambitious renewable energy targets and technological innovation. In 2022, the region added 1.9 GW of battery storage capacity, with expectations to reach 3.7 GW in 2023.

How does Bess work in Finland?

BESS operators can also participate in cross-border markets to provide storage capacity for ancillary services, such as frequency regulation, which helps maintain grid stability and reliability. Ancillary services are currently the primary revenue source for BESS in Finland.

How will the Finnish government help to accelerate Bess investments?

Moreover, the Finnish government is improving policy support with tax exemptions for certain green investments, including battery storage, to meet the climate targets. These policies will help to accelerate BESS investments further by making them even more attractive financially.

Why does Finland need Bess?

The need for BESS is exceptionally high in Finland because the country has set one of the world's most aggressive climate targets. The government has a legal obligation to reach carbon neutrality by 2035. Renewable energy sources account for over 50% of electricity production, and several renewable projects are being planned or developed.

TERVETULOA ATTENDON ITSEPALVELU PORTAALIIN Aloittamassa mobiiliESSin käyttöä? Lataa ensin sovelluskaupasta ESS 7 ja valitse alta työskentelyalueesi kirjautuaksesi sisään tai määrittääksesi mobiilisovelluksen.
