

PV energy storage project financing options in Greece 2026

How much will Greece spend on energy storage in 2026?

Developers in Greece will bid to secure annual payments for large-scale storage facilities that must be operational before 2026. The European Union has approved a plan by the Greek government to spend around EUR341 million (\$339 million) to commission 900 MW of grid-scale energy storage capacity.

Can a PV power plant operate profitably in Greece?

The renewable energy produced each year from the PV power plant varied between 33.35 MW h in Ioannina and 41.63 MW h in Tymbakion while the average value for the 46 locations is 37.61 MW h. The results of the financial analysis demonstrate that a PV power plant can operate profitably at any of the considered sites in Greece.

What happens if a project is successful in Greece?

Successful bidders will also receive an investment grant during construction of their projects, with the Greek government committing to issue project awards next year and developers pledging to have them operational before 2026.
