

# Residential ESS cost breakdown in New Zealand 2025

How do materials affect the cost of building a new home NZ?

The choice of materials significantly impacts the cost of building a new home NZ. High-quality or imported materials can drive up expenses, whereas local and standard materials are more budget-friendly. Sustainable or energy-efficient materials may have a higher upfront cost but can lead to savings in the long run.

Is the cost of building a new home falling in New Zealand?

The latest Cordell Construction Index (July 2024) says the cost\*of building a new home in New Zealand fell by 1.1%. Although modest,this drop does suggest some easing of pressure in the construction sector. In fact,annual building cost inflation was just 2.4% in 2023 - the lowest since 2016. Of course,it does depend where you're building.

How much does it cost to build a house in NZ?

The average cost to build a house in NZ ranges from \$2,500 to \$4,000 per square meter. This can vary depending on factors such as location,design complexity,and material choices. What factors influence the cost of building a house in NZ? Is it cheaper to build a house or buy an existing one in New Zealand?
