

# Residential ESS project financing options in Chile 2025

Why are project finance transactions increasing in Chile?

Fitch Ratings-Sao Paulo/New York-01 April 2025: Project finance transactions in Chile are expected to increase due to the recent commissioning of large battery energy storage systems (BESS), Fitch Ratings says. This should balance electricity supply and demand while reducing price volatility for renewable energy generators.

How many Bess projects are there in Chile?

This momentum is reflected in the data: AMI estimates that there is a 7.7 GW pipeline of BESS projects in Chile, far and away the most advanced front of the meter (FTM) storage market in Latin America. Only 505 MW of BESS projects are currently operational in the entire region.

How much energy storage will Chile have in 2024?

During the Energy Storage Summit Latin America (ESS LatAm) in October 2024, Ana Rojas, executive director at the Chilean renewable energy and energy storage association (ACERA), explained how the current levels of curtailment in Chile, which could end up at approximately 5 TWh in 2024, could power up to 3.4 GW of 4-hour duration energy storage.

How many EPC agreements has Metlen signed in 2025?

Specifically, METLEN has signed and executed in the beginning of 2025 3 individual EPC agreements that encompass the implementation of a total 190.5 MWp of Solar energy capacity and more than 2,500 MWh of Battery Energy Storage System (BESS) capacity. All projects are set to be delivered no later than Q1 2026.

Should energy storage be a luxury asset in Chile?

Having energy storage in Chile is no longer a luxury asset but has become an "absolute necessity", explains Alejandro McDonough, business development manager of Americas area sales at Energy Storage and Optimisation (ES&O).

Will new solar assets in Chile have storage components?

New utility-scale renewable and PMGE assets in Chile (most of which are distributed solar plants smaller than 9 MW) will likely all have storage components moving forward.

DNV has played a key role in providing comprehensive advisory services to Atlas Renewable Energy to secure USD 510 million in financing for the landmark Estepa hybrid ...

Solar and wind power supply fluctuates, Energy storage systems (ESS) play a crucial role in smoothening out this intermittency and enabling a continuous supply of energy when needed. Thus, for sustainable renewable energy ...

# Residential ESS project financing options in Chile 2025

As per the agreement, BYD will supply 2,136 MC Cube ESS units meant to be deployed in the first and second phases of the project slated for operation in 2024 and 2025 ...

Large ESS - Additional Siting and Land Use Approvals action with large ESS projects, especially for standalone projects on vacant or undeveloped lots. These steps can vary significantly from ...

Zelestra has secured a \$282 million finance package for the Aurora project, in the municipality of Pozo Almonte in Chile's Tarapacá region. Zelestra said the funding agreement ...

Chile Energy Minister Diego Pardow was present at the inauguration of the 200 MW/800 MWh BESS del Desierto, a project its developers describe as the first large-scale standalone energy storage plant in Latin ...

However, in recent years, Chile has been facing some serious issues: curtailment and marginal costs nearing zero. With solar project owners needing to find a solution to make their projects financially viable, battery ...

Standalone Energy Storage Systems (ESS) are rapidly emerging as a key market, with 6.1 gigawatts of tenders issued in the first quarter of 2025 alone, accounting for 64% of the total utility-scale energy storage ...

Spanish renewables group Grenergy has enlisted Clifford Chance LLP in Madrid and Carey in Santiago to obtain a US\$299 million green financing to fund the development of a ...

Chile has an operational installed capacity of approximately 1GW in batteries, and another 3GW is under construction. Battery storage has been largely financed by bank lending ...

Installed ESS capacity in China has grown every year, as the country pledges to achieve net-zero by 2026, and with installed renewable energy capacity continually increasing. ...

The residential PV-ESS (Photovoltaic Energy Storage System) market is experiencing robust growth, driven by increasing electricity costs, rising concerns about climate ...

The anticipation of the capacity market, the high energy spreads, and the lack of an ancillary services market in Chile has led project owners to develop large projects (100MWh+) with longer-duration batteries ...

The project involves a 120 MW battery energy storage system (BESS) and a 220 kV high voltage line with a length of 230 meters, located in the commune of Melipilla, Metropolitan Region of Santiago.

Explore the booming Global Energy Storage System (ESS) market. Discover current status, key 2025 trends, drivers like renewable integration, challenges, and the future outlook for this vital ...

# **Residential ESS project financing options in Chile 2025**

1 ?&#0183; LAS VEGAS, NV / ACCESS Newswire / September 8, 2025 / RelyEZ Energy Storage, a global leader in integrated energy solutions, will unveil its latest breakthroughs at RE+ 2025 in ...
