

Residential ESS tender price in Korea 2026

Will Korea continue ESS procurement in 2026?

Under the 11th Basic Plan for Electricity Supply and Demand, Korea intends to continue ESS procurement through the Central Contract Market mechanism, totaling 2.1 GW on the mainland between 2026 and 2029, and 0.12 GW in Jeju between 2026 and 2028. In light of this plan, further rounds of ESS auctions are expected in the coming years.

How will South Korea's ESS market renewal affect its future?

Such a renewal requires changes on multiple fronts. Domestic infrastructural support for large-scale utilization, improved safety due diligence, and quick adoption of new technologies are some of the concerns likely to heavily influence the future of South Korea's ESS market renewal.

Is South Korea a BESS supplier?

South Korea is also a major exporter of batteries and energy storage technologies, with Samsung SDI and LG Energy Solution among significant suppliers of products from cells to complete BESS solutions internationally. According to the newest Basic Plan, the country aims to capture a 30% share of the global BESS market by 2036.

How has the ESS market changed over the years?

However, a string of ESS-related fires and a lack of infrastructure had dampened investments in this market. This was a heavy hit for the energy industry, but developments of safer technology and renewed state support have recently given new life to the domestic ESS market.

How many MW of BESS will be installed on Jeju Island?

The capacity will be split between 500 MW of large-scale BESS on the Korean mainland and 40 MW of the technology on Jeju Island, a popular destination for domestic and international tourists.
