

Rooftop solar storage project financing options in Libya 2025

Will Libya's Sadada Solar Project Advance in 2025?

Libya's Sadada solar project is expected to advance in 2025, with preparations underway. Developed by energy major TotalEnergies in partnership with the General Electricity Company of Libya and the Renewable Energy Authority of Libya (REAOL), the project will have a capacity of 500 MW.

Will TotalEnergies build a solar project in Libya?

TotalEnergies is anticipated to commission its 500 MW Sadada project in 2025, a monumental solar project in Libya. The project is being built in partnership with the General Electricity Company of Libya. The Renewable Energy Authority of Libya also has a role to play in its delivery.

What is the largest solar energy project in Libya?

In June 2022, Total Energies, in collaboration with the General Electricity Company of Libya (GECOL) and REAoL, launched the Sadada Solar Energy 500 MW project in Al-Sadada, which is set to become the largest of its kind in the country.

Will the Sadada project help Libya transition to renewables?

Once fully commissioned, the Sadada project is expected to play a key role in Libya's transition to renewables. Currently, 25% of Libya's electricity production depends on oil and gas. However, the country has immense solar potential that Dr. Elansari notes must be utilized.

Is Libya a good place to invest in a diversified energy portfolio?

Libya's position as a country with abundant oil reserves and an average of 3,200 hours of sunshine per year presents a unique opportunity for a diversified energy portfolio.

What is the Sadada solar power project?

The Sadada solar power project is a significant milestone for Libya's transition towards renewable energy, providing a catalyst for economic growth and job creation while reducing the country's reliance on oil exports.
