

# School solar storage cost breakdown in New Zealand 2025

How much does a solar panel cost in New Zealand?

You'll pay around \$8,000 fully installed. While global demand bumped prices slightly in 2022 and 2023, costs are falling again in 2025 -- thanks to sharp drops in solar panel pricing. Use our free 3 Solar Quotes Service to compare competitive prices from top-rated installers. [What Is The Cost Of A Solar Panel System In New Zealand?](#)

Should schools buy or lease solar panels?

When evaluating costs, schools may consider a large capital investment upfront to purchase and install the solar panels, in comparison to leasing. Leasing solar panels means there are no upfront costs, and schools and kura pay a fixed price to the solar panel company, usually at a rate lower than existing energy costs.

Will regulatory reforms reshape New Zealand's solar industry?

New Zealand's solar industry stands at a pivotal moment as regulatory reforms promise to reshape project economics and market opportunities. The Energy Competition Task Force's recent proposals signal a fundamental shift in how solar generation will be valued and compensated.

Should schools invest in solar panels?

Batteries can provide flexibility in utilising the electricity generated by panels when the school is closed, that is, during weekends and school holidays. When evaluating costs, schools may consider a large capital investment upfront to purchase and install the solar panels, in comparison to leasing.

How many solar panels do I need in New Zealand?

Figuring out how many solar panels you need for your home in New Zealand doesn't have to be a head-scratcher. It all comes down to your household's energy habits, roof space, and how much sunshine your area gets. Most Kiwi homes opt for systems between 4kW and 8kW, which translates to around 9 to 19 solar panels.

Can solar power help schools save money?

This can be a daunting task, as schools work to balance available funding against expected outcomes, which need to meet current and future demands of the school and its infrastructure. Solar system provider Power Technology says solar photovoltaics (PV) can help schools to save money, and the environment.
